U.S. Construction Industry National Research Council, Division on Engineering and Physical Sciences, Board on Infrastructure and the Constructed Environment, Committee on Advancing the Productivity and Competitiveness of the U.S. Industry Workshop, 2009-12-09 Construction productivity how well how quickly and at what cost buildings and infrastructure can be constructed directly affects prices for homes and consumer goods and the robustness of the national economy. Industry analysts differ on whether construction industry productivity is improving or declining. Still, advances in available and emerging technologies offer significant opportunities to improve construction efficiency substantially in the 21st century and to help meet other national challenges such as environmental sustainability. Advancing the Competitiveness and Efficiency of the U.S. Construction Industry identifies five interrelated activities that could significantly improve the quality, timeliness, cost effectiveness, and sustainability of construction projects. These activities include widespread deployment and use of interoperable technology applications, improved job site efficiency through more effective interfacing of people, processes, materials, equipment, and information; greater use of prefabrication, preassembly, modularization, and off site fabrication techniques and processes; innovative, widespread use of demonstration installations; and effective performance measurement to drive efficiency and support innovation. The book recommends that the National Institute of Standards and Technology work with industry leaders to develop a collaborative strategy to fully implement and deploy the five activities.

Applied Communications Skills for the Construction Trades Steven A. Rigolosi, 2002 This book is the first book to offer comprehensive instruction to construction trainees and even experienced workers in the four key areas of on-the-job communication: Listening, Reading, Speaking, and Writing. Unlike other communication books which are often written for the general public or for people who work in an office environment, this book has been prepared specifically to meet the needs of the construction industry.

Ordinary Sudan, 1504-2019 Elena Vezzadini, Iris Seri-Hersch, Lucie Revilla, Anael Poussier, Mahassin Abdul Jalil, 2023-07-24 This book examines how ordinary people have induced the most important political shifts in the history of the Sudan, including the last 2019 Revolution, but also how they have participated to the construction of consensus that regimes needed to survive. The two volumes of the book follow an organization according to discipline: the first is mostly on social history and the second on politics.
