

How to Explain Family Science to Anyone

Create Your Family Science Elevator Pitch

When someone asks you "What is Family Science?" how can you answer effectively? Use our elevator pitch — the steps of progressively introducing a concept during a short elevator ride.

Follow These Steps:

1

Definition 1: Give a basic description of Family Science. One definition is good to share. Some interesting facts or a surprising example helps.

2

Definition 2: In 1-2 sentences, expand on how Family Science connects concepts and important

3

Definition 3: Give a real-life example of how Family Science understanding would be helpful in practice. Give your words to something your audience cares about.

4

Definition 4: Address how others might misunderstand your examples (connect with your audience's already known about other topics as a reference point).

5

Definition 5: Offer one interesting piece of good advice using Family Science concepts. Encourage readers why it's important to think specifically on Family.

What Can They? Define it. Illustrate it.

If you have 30 seconds or less, focus on steps 1 and 3. Give a clear description and real-world example.

Keep one fun example.

It's **funny** for your own pitch, it's **help** to give your more facts

Family Science is...
the scientific study of families.
It's the relationship between people

Your Elevator Pitch Should Be...

- Easy to understand
- Memorable — not too much on numbers or facts
- Concise
- Interesting to someone
- Engaged people
- Positive & helpful

Tips for a Successful Pitch

- Take 10-15 seconds. You can share as much as you want.
- Don't think about being perfect and **be confident**. Many presentations turn out to be good.
- Adapt to fit your relationship. If you're in a **work** you can use a more development oriented. If you're family science enthusiast.
- Don't worry about perfect first draft — you can make changes.
- Remember that you're a human speaking to a human.
