Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Beyond the Bubble Test Linda Darling-Hammond, Frank Adamson, 2014-06-16 Performance assessment is a hot topic in school systems and educators continue to analyze its costs benefits and feasibility as a replacement for high stakes testing Until now researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment Beyond the Bubble Test How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field and not a moment too soon Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy Instead teachers need to engage students in deeper learning assessing their ability to use higher order skills Skills like synthesizing information understanding evidence and critical problem solving are not achieved when we teach to multiple choice exams Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests with something that works better This book provides new perspectives on current performance assessment research plus an incisive look at what's possible at the local and state levels Linda Darling-Hammond with a team of leading scholars bring together lessons learned new directions and solid recommendations into a single readily accessible compendium Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States This comprehensive resource also looks beyond our U.S. borders to Singapore Hong Kong and other places whose

reform mindedness can serve as an example to us

Tests That Teach Karen Tankersley, 2010-06-22 Now that the No Child Left Behind Act has left its mark on public education educators across the United States are all the more invested in preparing their students for state and national assessments In *Tests That Teach Using Standardized Tests to Improve Instruction* Karen Tankersley guides you with proven tips and instructional strategies to help your students perform to their potential Covering all core contents areas language arts social studies math and science and respecting all levels of student performance Tankersley Examines the various types of questions that routinely appear on these assessments Provides sample multiple choice and constructed response questions from the tests Offers guidelines on how to create daily lessons that encourage students to practice the skills and demonstrate the knowledge they ll need to use on the high stakes tests Suggests word lists games discussion topics and testing ideas for your classroom and Describes how school staff can create a learning community that fosters collaboration among teachers and high performance in students Also included are a wealth of online resources for lesson plans daily classroom activities and virtual field trips as well as links to every state s released materials on its own assessment As Tankersley explains teaching students the skills they need to do well on constructed response tests will better prepare students both to score well on state and national assessments and to take their place as thoughtful and organized thinkers in a rapidly changing competitive society
