## **Paul Mason Lectures Talks On Post Capitalism:**

PostCapitalism Paul Mason,2015-07-30 From Paul Mason the award winning Channel 4 presenter Postcapitalism is a guide to our era of seismic economic change and how we can build a more equal society Over the past two centuries or so capitalism has undergone continual change economic cycles that lurch from boom to bust and has always emerged transformed and strengthened Surveying this turbulent history Paul Mason wonders whether today we are on the brink of a change so big so profound that this time capitalism itself the immensely complex system by which entire societies function has reached its limits and is changing into something wholly new At the heart of this change is information technology a revolution that as Mason shows has the potential to reshape utterly our familiar notions of work production and value and to destroy an economy based on markets and private ownership in fact he contends it is already doing so Almost unnoticed in the niches and hollows of the market system whole swathes of economic life are changing Goods and services that no longer respond to the dictates of neoliberalism are appearing from parallel currencies and time banks to cooperatives and self managed online spaces Vast numbers of people are changing their behaviour discovering new forms of ownership lending and doing business that are distinct from and contrary to the current system of state backed corporate capitalism In this groundbreaking book Mason shows how from the ashes of the recent financial crisis we have the chance to create a more socially just and sustainable global economy Moving beyond capitalism he shows is no longer a utopian dream This is the first time in human history in which equipped with an understanding of what is happening around us we can predict and shape rather than simply react to seismic change

Postcapitalist Desire Mark Fisher,2020-09-22 A collection of transcripts from Mark Fisher's final series of lectures at Goldsmiths University of London in late 2016 Edited with an introduction by Matt Colquhoun this collection of lecture notes and transcriptions reveals acclaimed writer and blogger Mark Fisher in his element the classroom outlining a project that Fisher's death left so bittersweetly unfinished Beginning with that most

fundamental of questions Do we really want what we say we want Fisher explores the relationship between desire and capitalism and wonders what new forms of desire we might still excavate from the past present and future From the emergence and failure of the counterculture in the 1970s to the continued development of his left accelerationist line of thinking this volume charts a tragically interrupted course for thinking about the raising of a new kind of consciousness and the cultural and political implications of doing so For Fisher this process of consciousness raising was always fundamentally

psychedelic just not in the way that we might think **The Disappearing Product** Chris Bilton,2017-09-29 Technological and social change has transfigured the market for creative industries A new generation of intermediaries including Amazon Apple Facebook and Google deal in context how we consume more than content what we consume displacing cultural producers devaluing culturing products and monopolising consumer attention Drawing on theoretical models across disciplines and rich in practical examples this book charts an approach to marketing which challenges cultural producers to

reclaim their place in the creative economy     [Fictional Labor](#) Jiewon Baek,2022-07-15 This book advocates for the ethically formative labor that fiction accomplishes As a force of production the fictional labor of literature and the visual arts shapes the formation of collective meaning in an era marked by the negligence of social financial and environmental responsibility As neoliberalism s hegemony since the 1980s has intensified through the proliferation of digital technologies in the 21st century considering works of creative art as an ethically productive force is a necessary complement to political and economic critiques The book invites readers to rethink how mutations in the production circulation and consumption of literary and visual materials are implicated in the commodification of information and attention for private gain The link can have a positive effect that transforms the social relation from a capitalist ethos that expends life for profit to an alterity driven ethos that defends life But remedying the paucity of moral sentiments of social existence requires fictional labor to generate ethical sensibilities cares desires and wills The book s close analyses demonstrate the aesthetic and formal aspects of literary and visual art that mediate between social relations to yield a dependence alterity including the otherness of a precarious present a menacing future beyond economic mastery and an environment enmeshed with living beings and things

*Social Democracy and the Crisis of Equality* Carol Johnson,2019-02-20 This book analyses social democratic parties attempts to tackle inequality in increasingly challenging times It provides a distinctive contribution to the literature on the so called crisis of social democracy by exploring the role of equality policy in this crisis While the main focus is on analysing Australian Labor governments examples are also given from a wide range of parties internationally The book traces how a traditional focus on class has expanded to include other forms of inequality including issues of gender race ethnicity and sexuality and explores both the intersections and potential tensions that result Meanwhile there are new challenges for equality policy arising from a changing geo economics the rise of Asia the legacies of neoliberalism and the impact of technological disruption
