Prime Big Deals Facebook Review:

Dynamics of Big Internet Industry Groups and Future Trends Miguel Gómez-Uranga, Jon Mikel Zabala-Iturriagagoitia, Jon Barrutia, 2016-03-31 This book applies a new analytical framework to the study of the evolution of large Internet companies such as Apple, Google, Microsoft, Facebook, Amazon, and Samsung. It sheds light on the dynamics of business groups which are approached as business ecosystems and introduces the concept of Epigenetic Economic Dynamics (EED) which is defined as the study of the epigenetic dynamics generated as a result of the adaptation of organizations to major changes in their respective environments. The book augments the existing literature on evolutionary economic thinking with findings from epigenetics which are proving increasingly useful in analyzing the workings of large organizations. It also details the theoretical and conceptual nature of recent work based on evolutionary economics mainly from the perspective of generalized Darwinism, resilience, and related variety and complements the work conducted on evolutionary economics by applying the analytical framework of EED. It makes it easier to forecast future dynamics on the Internet by proving that a sizable number of big business groups are veering from their initial paths to take unprecedented new directions as a result of competition pressure and as such is a valuable resource for postgraduates and researchers as well as those involved in economics and innovation studies.

House of Commons - Culture, Media and Sport Committee: Supporting The Creative Economy - Volume I: HC 674

Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2013-09-26 This report warns that the extraordinary success of the UK's creative industries may be jeopardised by any dilution of intellectual property rights and the failure to tackle online piracy. The Committee also strongly condemns the failure of Google in particular to tackle access of copyright infringing websites through its search engine. Such illegal piracy combined with proposals arising from the Hargreaves review to introduce copyright exceptions and a failure to strengthen copyright enforcement as envisaged by the Digital Economy Act 2010 together threaten the livelihoods of the individuals and industries that contribute over 36 billion annually to the UK economy. Also the Olympics No Marketing Rights scheme is excessively restrictive and is preventing British creative companies from realising the benefits they deserve from the Olympic legacy. The Committee calls for a central champion of Intellectual Property in Government to promote and protect the interests of UK intellectual property, the maximum penalty for serious online IP theft to be increased to 10 years imprisonment in line with the punishment for such offences in the physical world, more evidence and scrutiny before any exceptions to copyright such as those suggested by Hargreaves are applied, redoubled efforts to ensure that the video games tax credit is approved by the European Commission and introduced as soon as possible, reforms to the income tax and tax reliefs systems to recognise adequately the freelance nature of much creative work, greater recognition of the importance of arts subjects in the curriculum.

Leading and Managing in the Digital Era Gregory Prastacos, Nancy Pouloudi, 2024-12-30
Rapidly emerging digital technologies such as artificial intelligence, robotics, the Internet of Things, blockchain, and virtual and

augmented reality are driving profound changes in the workplace and society. These technologies are radically transforming areas of cognitive and physical work while opening up new opportunities for complex decision making and increased efficiency. As a result, a new set of skills and a new style of leadership is required where digital savviness is essential together with an increased focus on collaboration, transparency, entrepreneurship, diversity, and inclusion. This book, organized in six parts, presents key developments of the digital age in leadership management, the future of work and business education. Part I, Governance in the Digital Era, sets the scene by reviewing the challenges that the digital era presents for policy makers at national and global levels. This research is complemented by research at the organizational level in Part II, Strategy and Entrepreneurship in the Digital Era, that discusses strategic issues that organizations of different sizes and levels of digital maturity face. Part III, Innovation and digital transformation, presents examples from different sectors where AI and other innovative technologies are integrated in business. Part IV, The Future of Work, focuses on the changing conditions of workspaces and their implications for human resource management and the future of work. Part V, Leadership and Skills for the Digital Era, explores the impact of this changing business and societal landscape and studies the leadership style and skills needed in these conditions. Finally, Part VI, The Future of Business Education, studies how such skills and leadership may be cultivated in business education and draws lessons for the future. The book is based on a selection of the best papers on this topic presented at the international conference LMDE held in Athens, Greece, in June 2023.

Breaking the News Alex Marlow, 2021-05-18. From the editor in chief of Breitbart News, the New York Times bestselling must-read. Sean Hannity's investigation into how the establishment media became weaponized against Donald Trump and his supporters on behalf of the political left. In this timely and important book, Glenn Beck Marlow explains how the establishment press destroyed its own credibility with a relentless stream of fake news designed to smear Donald Trump and his supporters while advancing a leftist agenda. He also reveals key details on how our information gatekeepers truly operate and why America's fake news moment might never end. Breitbart and Trump began banging the drum about fake news during the 2016 election and it resonated with millions of voters because they intuitively knew the corporate media was willing to say or write anything to achieve their political ends. It's a battle cry that continues to this day. Deeply researched and eye-opening, *Breaking the News* rips back the curtain on the inner workings of how the establishment media weaponizes information to achieve their political and cultural ends.
