*Building Smart Home Automation Solutions with Home Assistant* Marco Carvalho, 2023-09-15

A step by step guide to building cost effective and complete home automation DIY projects using tools such as Home Assistant, Raspberry Pi, IoT devices, the Tasmota sensor, ESP32 and Grafana.

**Key Features**

- Learn by doing using real life practical examples to build your own home automation system.
- Create, hack and configure IoT devices through hands on projects to be used with or without Home Assistant.
- Customize your home automation system using Home Assistant, Node RED, InfluxDB and Grafana.
- Purchase of the print or Kindle book includes a free PDF eBook.
- Book Description: Picture a home where you can adjust the lighting based on the time of day or when movement is detected. In this same home you can also detect when a door is unexpectedly opened or an alarm is triggered in response to any suspicious activity. Such automated devices form part of a smart home and the exciting part is that this book teaches you how to create and manage these devices all by yourself. This book helps you create your own ecosystem to automate your home using Home Assistant software. You'll begin by understanding the components of a home automation system and learn how to create, hack and configure them to operate seamlessly. Then you'll set up Home Assistant on a Raspberry Pi to work as a home automation server, build your own IoT sensors based on ESP32, ESP8266 and set up real life automation use cases using hands on examples and projects. The chapters will also guide you in using software tools such as Node RED, InfluxDB and Grafana to manage, present and use data collected from your Home Automation devices. Finally you'll gain insights into new technologies and trends in the home automation space to help you continue with your learning journey.
- By the end of this book you'll be able to build your own creative IoT based home automation system using different
