Iowa Department on Aging receives grant to prevent falls by at-risk Iowans

The Iowa Department on Aging was awarded a 14-month grant to develop and implement a fall prevention program. The project, supported by the 2014 Transportation and Public Health Fund, is to advance the implementation and dissemination of evidence-based fall prevention programs and strategies for at-risk persons, including older adults and individuals with disabilities.

While falls are the leading cause of death, injury and hospitalization for those 65 years of age and older across the country, the number of fall-related injuries and deaths for older persons has increased by 20 percent over the past decade. As a result, more persons over the age of 65 die each year as a result of fall-related injuries than cancer combined in home care facilities. The fall prevention grant will help Iowa address this growing problem.

The goals of the project are (1) to increase the number of older adults and adults with disabilities who are participating in evidence-based fall prevention programs and (2) to embed evidence-based fall prevention programs into an integrated, sustainable fall prevention network.

To meet these goals, the Iowa Department on Aging is partnering

with the Iowa Fall Coalition, the Iowa Association of Long-Term Care, the Iowa Association of Home Agencies for Aging, and other key stakeholders to:

- Increase the availability and variety of evidence-based fall prevention programs, such as "Master of Balance," "Staying On" and "Fall-Proofing."
- Increase awareness among health care professionals and the general public regarding the prevalence of falls and programs that can reduce falls for at-risk individuals.
- Establish a network of fall prevention programs for evidence-based fall prevention programs.
- Create an online repository of fall prevention materials and impact data for the public, health care professionals and other stakeholders.

For more information on fall prevention activities visit www.iowadepaging.org.
