Colony CEO Forrester Research In Modern Monopolies Alex Moazed and Nicholas L. Johnson tell the definitive story of what has changed what it means for businesses today and how managers entrepreneurs and business owners can adapt and thrive in this new era What do Google Snapchat Tinder Amazon and Uber have in common besides soaring market share They're platforms a new business model that has quietly become the only game in town creating vast fortunes for its founders while dominating everyone's daily life A platform by definition creates value by facilitating an exchange between two or more interdependent groups So rather than making things they simply connect people The Internet today is awash in platforms Facebook is responsible for nearly twenty five percent of total Web visits and the Google platform crash in 2013

took about forty percent of Internet traffic with it. Representing the ten most trafficked sites in the U.S., platforms are also prominent over the globe. In China, they hold the top eight spots in web traffic rankings. The advent of mobile computing and its ubiquitous connectivity have forever altered how we interact with each other, melding the digital and physical worlds and blurring distinctions between offline and online. These platform giants are expanding their influence from the digital world to the whole economy. Yet few people truly grasp the radical structural shifts of the last ten years. Satisfying and timely a valuable contribution to our understanding of modern business.
