Robert L. Thorndike,Elizabeth Hagen,1960 *How to Measure Mind* Santo Di Nuovo,Maria Sinatra,2022-09-26 Get to grips with the debate around the historical epistemological origins of psychometric assessment

Written by leading experts Explores modern and historical aspects Full of illustrations A thoughtful look at the history of psychological assessment While there have been significant developments in the technical aspects of assessing mental functioning there is still much to be debated about the motivations and meanings of measuring the mind How can mental faculties be objectified and what influence does subjectivity have on the object being measured and the mind measuring it What are the consequences of quantifying complex and interdependent functions and scaling these measurements for psychometric instruments The contributors of this edited volume explore these questions by adopting a historical and epistemological approach to consider how psychometric assessment was born and developed within the affirmation of psychology as an empirical science Chapters explore the birth of the scientific approach as well as different assessment methods of cognitive abilities and personality traits and the development of new technologies that support psychological evaluation and its applications in educational and rehabilitative fields This book is of interest to researchers of human behavior as well as practicing psychologists and psychiatrists who want to deepen their understanding of the historical and epistemological roots of psychological assessment

The Mind and Its Education by George Herbert Betts

THE MIND AND ITS EDUCATION

CHAPTER I THE MIND OR CONSCIOUSNESS

We are to study the mind and its education but how It is easy to understand how we may investigate the great world of material things about us for we can see it touch it weigh it or measure it But how are we to discover the nature of the mind or come to know the processes by which consciousness works For mind is intangible we cannot see it feel it taste it or handle it Mind belongs not to the realm of matter which is known to the senses but to the realm of spirit which the senses can never grasp And yet the mind can be known and studied as truly and as scientifically as can the world of matter Let us first of all see how this can be done

1 HOW MIND IS TO BE KNOWN

The Personal Character of Consciousness

Mind can be observed and known But each one can know directly only his own mind and not another s You and I may look into each other s face and there guess the meaning that lies back of the smile or frown or flash of the eye and so read something of the mind s activity But neither directly meets the other s mind I may learn to recognize your features know your voice respond to the clasp of your hand but the mind the consciousness which does your thinking and feels your joys and sorrows I can never know completely Indeed I can never know your mind at all except through your bodily acts and expressions Nor is there any way in which you can reveal your mind your spiritual self to me except through these means It follows therefore that only you can ever know you and only I can ever know I in any first hand and immediate way Between your consciousness and mine there exists a wide gap that cannot be bridged Each of us lives apart We are like ships that pass and hail each other in passing but do not touch We may work together live together come to love or hate each other and yet our inmost selves forever stand alone They must live their own lives think their own thoughts and arrive at their own destiny

Introspection the Only Means of Discovering Nature of Consciousness

What then is mind What is the thing that we call consciousness No mere definition can ever make it clearer than it is at this moment to each of us The only way to know what mind is is to look in upon our own consciousness and observe what is transpiring there In the language of the psychologist we must introspect For one can never come to understand the nature of mind and its laws of working by listening to lectures or reading text books alone There is no psychology in the text but only in your living flowing stream of thought and mine True the lecture and the book may tell us what to look for when we introspect and how to understand what we find But the statements and descriptions about our minds must be verified by our own observation and experience before they become vital truth to us We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been

meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience An Introduction to the Theory of Mental and Social Measurements Edward Lee Thorndike,2010-03 Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive We are republishing these classic works in affordable high quality modern editions using the original text and artwork **Educational and Psychological Measurement** ,1941 **Perspectives in Educational and Psychological Measurement** Glenn H.
