Evangelia Sarandi, Dimitris Tsoukalas, Vassileios Fragoulakis, Aristidis M. Tsatsakis, 2025-02-07 Autoimmune and autoinflammatory diseases are increasingly being recognized as an important health challenge with a significant impact on patient's quality of life. Early diagnosis is a key determinant of the progression and proper management of these diseases. Ongoing research advancements have led to the implementation of omics techniques such as genomics and metabolomics to identify disease biomarkers that could serve as potential diagnostic and therapeutic targets. However, their translation to clinical practice is being hampered by the lack of validated and reproducible results. In addition, the unraveling of the aetiopathogenetic mechanisms leading to the onset of these diseases will provide new insights in the prevention, prediction and treatment of autoimmune and autoinflammatory diseases. **New Advances in Neurorehabilitation** Nicola Smania, Stefano Tamburin, Giorgio Sandrini, Leopold Saltuari, Volker Hoemberg, 2019-12-24 *Comparative Guide to American Colleges* James Cass, Max Birnbaum, 1987 *Teaching Secondary and Middle School Mathematics* Daniel J. Innovations in the field of genomics, phenomics, transcriptomics, proteomics, epigenomics, metabolomics and microbiomics integrated with molecular informatics can be an appropriate methodology to develop novel prediction, prevention and treatment strategies for human diseases based on differences in people's genes, termed as Precision medicine, commonly referred to as Personalized Medicine. One size fits all approach for treating patients is not suitable; strategy only for certain extant but not for all patients as patients are unique in genetic makeup and influenced by environmental factors and lifestyle. Molecular informatics can target customized treatment strategies to reduce exposure to adverse effects and to achieve the goal of precision medicine to identify the right treatments to the right patients at the right time. Integrated and standardised new technologies will be essential to ensure effective translation if the precision medicine is to become a reality for various human diseases.
