**The Logic of Sufficiency** Thomas Princen, 2005-09-30 What if modern society put a priority on the material security of its citizens and the ecological integrity of its resource base What if it took ecological constraint as a given not a hindrance but a source of long term economic security How would it organize itself structure its industry shape its consumption Across time and across cultures people actually have adapted to ecological constraint They have changed behavior they have built institutions And they have developed norms and principles for their time Today's environmental challenges at once global technological and commercial require new behaviors new institutions and new principles In this highly original work Thomas Princen builds one such principle sufficiency Sufficiency is not about denial not about sacrifice or doing without Rather when

resource depletion and overconsumption are real sufficiency is about doing well It is about good work and good governance it is about goods that are good only to a point With examples ranging from timbering and fishing to automobile and meat production Princen shows that sufficiency is perfectly sensible and yet absolutely contrary to modern society's dominant principle efficiency He argues that seeking enough when more is possible is both intuitive and rational personally organizationally and ecologically rational And under global ecological constraint it is ethical Over the long term an economy indeed a society cannot operate as if there's never enough and never too much

### *A Paradise of Small Houses* Max

Podemski,2024-03-26 From the Haitian style shotgun houses of the 19th century to the lavish high rises of the 21st century a walk through the streets of America's neighborhoods that reveals the rich history and future of urban housing The Philadelphia row house The New York tenement The Boston triple decker Every American city has its own iconic housing style structures that have been home to generations of families and are symbols of identity and pride Max Podemski an urban planner for the city of Los Angeles and lifelong architecture buff has spent his career in and around these buildings Deftly combining his years of experience with extensive research Podemski walks the reader through the history of our dwelling spaces and offers a blueprint for how time tested urban planning models can help us build the homes the United States so desperately needs In *A Paradise of Small Houses* Podemski charts how these dwellings have evolved over the centuries according to the geography climate population and culture of each city He introduces the reader to styles like Chicago's prefabricated workers cottages and LA's car friendly dingbats illuminating the human stories behind each city's iconic housing type Through it all Podemski interrogates the American values that have equated home ownership with success and led to the US housing crisis asking How can we look to the past to build the homes neighborhoods and cities of the future that our communities deserve

**Crossing Great Divides** John D. Fairfield,2024-06-28 Argues that the habit of thinking of the city and the country as opposites is at the root of our environmental and political disorder and suggests approaches to bridge this social political and ecological divide

### **Regionalism and the Humanities** Timothy R. Mahoney, Wendy J.

Katz,2008-12-01 Although the framework of regionalist studies may seem to be crumbling under the weight of increasing globalization this collection of seventeen essays makes clear that cultivating regionalism lies at the center of the humanist endeavor With interdisciplinary contributions from poets and fiction writers literary historians musicologists and historians of architecture agriculture and women this volume implements some of the most innovative and intriguing approaches to the history and value of regionalism as a category for investigation in the humanities In the volume's inaugural essay Annie Proulx discusses landscapes in American fiction comments on how she constructs characters and interprets current literary trends Edward Watts offers a theory of region that argues for comparisons of the United States to other former colonies of Great Britain including New Zealand Australia and Canada Whether considering a writer's connection to region or the idea of place in exploring what is meant by regionalism these essays uncover an enduring and evolving concept Although the

approaches and disciplines vary all are framed within the fundamental premise of the humanities the search to understand what it means to be human *Consuming Nature* Gregory Summers,2006 Takes readers to Wisconsin s Fox River Valley more than fifty years ago to recount how technological and economic progress contributed to residents growing opposition to the industrial pollution of the river *Industrial Cowboys* David Bruce Igler,1996 By 1900 Miller a window into the region s modernization between 1850 and 1920 The Changing American Countryside Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers The Changing American Countryside a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life

**First Nature, Second Nature, and Metropolitan Location** Paul R. Krugman,1991 This paper develops models of spatial equilibrium in which a central metropolis emerges to supply manufactured goods to an agricultural hinterland The location of the metropolis is not fully determined by the location of resources as long as it is not too far from the geographical center of the region the concentration of economic mass at the metropolis makes it the optimal location for manufacturing firms and is thus self justifying The approach in this paper therefore helps explain the role of historical accident and self fulfilling expectations in metropolitan location **Red Lodge and the Mythic West** Bonnie Christensen,2002 Tracing the story of Red Lodge from the 1880s to the present Christensen tells how a mining town managed to endure the vagaries of the West s unpredictable extractive industries economy She connects Red Lodge to a myriad of larger events and historical forces to show how national and regional influences have contributed to the development of local identities exploring how and why westerners first rejected and then embraced western images and how ethnicity wilderness and historic preservation became part of the identity that defined one town

**BOOK JACKET** *The Pullman Case* David Ray Papke,1999 The American Railway Union strike against the Pullman Palace

Car Company in 1894 pitted America's largest industrial union against 24 railroads and was broken up by federal troops and suppressed in the courts. Papke law Indiana U School of Law Indianapolis re examines events and personalities surrounding the strike related proceedings in the Chicago trial courts and the 1895 Supreme Court decision *In re Debs* which set important standards for labor injunctions. Block, Howard B. Rosing, 2015-09-03 Chicago began as a frontier town on the edge of white settlement and as the product of removal of culturally rich and diverse indigenous populations. The town grew into a place of speculation with the planned building of the Illinois and Michigan canal a boomtown and finally a mature city of immigrants from both overseas and elsewhere in the US. In this environment cultures mixed first at the taverns around Wolf Point where the forks of the Chicago River join and later at the jazz and other clubs along the Stroll in the black belt and in the storefront ethnic restaurants of today. Chicago was the place where the transcontinental railroads from the West and the trunk roads from the East met. Many downtown restaurants catered specifically to passengers transferring from train to train between one of the five major downtown railroad stations. This also led to destination restaurants where Hollywood stars and their onlookers would dine during overnight layovers between trains. At the same time Chicago became the candy capital of the US and a leading city for national conventions catering to the many participants looking for a great steak and atmosphere. Beyond hosting conventions and commerce Chicagoans also simply needed to eat safely and relatively cheaply. Chicago grew amazingly fast becoming the second largest city in the US in 1890. Chicago itself and its immediate surrounding area was also the site of agriculture both producing food for the city and for shipment elsewhere. Within the city industrial food manufacturers prospered highlighted by the meat processors at the Chicago stockyards but also including candy makers such as Brach's and Curtiss and companies such as Kraft Foods. At the same time large markets for local consumption emerged. The food biography of Chicago is a story of not just culture economics and innovation but also a history of regulation and regulators as they protected Chicago's food supply and built Chicago into a city where people not only come to eat but where locals rely on the availability of safe food and water. With vivid details and stories of local restaurants and food Block and Rosing reveal Chicago to be one of the foremost eating destinations in the country. Antipode, 1994 Nature's Metropolis Cheryl Hudson, 2017-07-15 Before the publication of *Nature's Metropolis* in 1991 historians generally treated urban and rural areas as distinct from one another each following separate lines of development and maturity.

**Bay Cities and Water Politics** Sarah S. Elkind, 1998 Combining insights from urban, western and environmental history Elkind examines the ways that people's reactions to their natural surroundings drive both demand for improved public services and political reform. She traces public works development in the Gilded Age and Progressive Era to explain how these programs united each city with its suburban neighbors creating new political entities and allowing Boston and Oakland to appropriate rural resources and thus overcome the environmental limits to their continued growth and prosperity. She also shows how when the power of

regionalism is turned to urban development environmental and social costs are sometimes overlooked      *Nature's Evil Dreams* Kevin L. Rozario,2005      *The Building News and Engineering Journal* ,1884      **Alternative Press Index** ,1994
