Why Knot? Philippe Petit,2013-04-09 Mr Petit is the perfect teacher in this fascinating educational volume on knot tying an art and science that has held civilization together The Wall Street Journal Philippe Petit is known for his astounding feat of daring when on August 7 1974 he stepped out on a wire illegally rigged between the World Trade Center s twin towers in New York City But beyond his balance courage and showmanship there was one thing Petit had to be absolutely certain of his knots Without the confidence that his knots would hold he never would have left the ground In fact while most of us don t think about them beyond tying our shoelaces the humble knot is crucial in countless contexts from sailing to sports to industrial safety to art agriculture and more In this truly unique book Petit offers a guide to tying over sixty of his essential knots with practical sketches illustrating his methods and clear tying instructions Filled with photos in which special knots were used during spectacular high wire walks quirky knot trivia personal anecdotes helpful tips magic tricks and special tying challenges Why Knot will entertain and educate readers of all ages In reading Philippe s book we are cogently reminded that without the ability to secure a rope or tether a goat or make fast the sheets of a galley much of the civilization that we take for granted would disappear as easily as a slipknot in the hands of a Vegas

conjurer Sting musician and activist His descriptions are clear he deploys humor frequently and he makes his points with anecdotes that are colorful and memorable Explaining the purpose and creation of knots and thanks to those flawless drawings Mr Petit earns perfect marks The Wall Street Journal *Time and Clocks (Illustrations)* Sir Henry H. Cunynghame, When we read the works of Homer or Virgil or Plato or turn to the later productions of Dante of Shakespeare of Milton and the host of writers and poets who have done so much to instruct and amuse us and to make our lives good and agreeable we are apt to look with some disappointment upon present times And when we turn to the field of art and compare Greek statues and Gothic or Renaissance architecture with our modern efforts we must feel bound to admit our inferiority to our ancestors And this leads us perhaps to question whether our age is the equal of those which have gone before or whether the human intellect is not on the decline This feeling however proceeds from a failure to remember that each age of the world has its peculiar points of strength as well as of weakness During one period that self denying patriotism and zeal for the common good will be developing which² is necessary for the formation of society During another the study of the principles of morality and religion will be in the ascendant During another the arts will take the lead during another poetry tragedy and lyric poetry and prose will be cultivated during another music will take its turn and out of rude peasant songs will evolve the harmony of the opera To our age is reserved the glory of being easily the foremost in scientific discovery Future ages may despise our literature surpass us in poetry complain that in philosophy we have done nothing and even deride and forget our music but they will only be able to look back with admiration on the band of scientific thinkers who in the seventeenth century reduced to a system the laws that govern the motions of worlds no less than those of atoms and who in the eighteenth and nineteenth founded the sciences of chemistry electricity sound heat light and who gave to mankind the steam engine the telegraph railways the methods of making huge structures of iron the dynamo the telephone and the thousand applications of science to the service of man And future students of history who shall be familiar with the conditions of our life will I think be also struck with surprise at our estimate of our own peculiar capabilities and faculties They will note with astonishment that a gentleman of the³ nineteenth century an age mighty in science and by no means pre eminent in art literature and philosophy should have considered it disgraceful to be ignorant of the accent with which a Greek or a Roman thought fit to pronounce a word should have been ashamed to be unable to construe a Latin aphorism and yet should have considered it no shame at all not to know how a telephone was made and why it worked They will smile when they observe that our highest university degrees our most lucrative rewards were given for the study of dead languages or arch ological investigations and that science our glory and that for which we have shown real ability should only have occupied a secondary place in our education They will smile when they learn that we considered that a knowledge of public affairs could only be acquired by a grounding in Greek particles or that it could ever have been thought that men could not command an army without a study of the tactics employed at the battle of Marathon But the battle between classical and scientific

education is not in reality so much a dispute regarding subjects to be taught as between methods of teaching. It is possible to teach classics so that they become a mental training of the highest value. It is possible to teach science so that it becomes a mere enslaving routine. The one great requirement for the education of the future is firmly to grasp the fact that a study of words is not a study of things and that a man cannot become a carpenter merely by learning the names of his tools.
