Teacher Education in Sub-Saharan Africa Rosarii Griffin, 2012-05-14 In the drive to achieve universal primary education as one of the Millennium Development Goals there is an increasing recognition of the urgency of focusing on teacher education to both meet the demand for more than one million qualified teachers required to achieve this goal within sub Saharan Africa as well as to combat the sometimes poor quality educational experience reported in the school. Currently approximately only one third of teachers are qualified to teach. This dearth in qualified teachers also means that secondary and tertiary education need to be improved upon to provide an educated cohort of graduates. This in turn will ensure that the quality of teacher trained and retained within the profession is of a sufficiently high standard to ensure sustainable progress. This volume focuses on the various aspects of teacher education which need to be addressed in order for the wider Millennium Goals to be achieved but more importantly so that each African child living within sub Saharan Africa will have the right to a quality education ensuring they too experience their right and entitlement as children to reach their full potential often taken for granted in Western countries giving African children the necessary tools to build a better future for themselves. Of particular interest to the education researcher and policy maker this volume's contributors look at the various issues and challenges around the teacher profession particularly in relation to resources and practices within sub Saharan Africa. The contributors examine the issue of building research capacity for educational research within teacher education Colleges and explore the concept of education for sustainable development with the view to improving the development of quality teacher education within the global South. In this volume research reports are presented highlighting the various challenges within the structure and provision of teacher education within certain national contexts including assessment and curricula issues which need to be addressed. This volume goes from the global to the local and examines teacher educator teaching learning and reflective practice issues within different contexts as well as exploring alternative pre service experiences for western teachers who wish to work within the sub Saharan context as well as some teacher educator exchange programmes between the South and North. Case countries explored include Lesotho, South Africa, Mozambique, Uganda, Kenya, Tanzania and Madagascar to mention but a few. Of particular value to the education researcher and policy maker this book provides a timely resource focusing on an area of neglect highlighting the central role of the teacher and teacher education towards sustainable development within the sub Saharan African context.

Handbook on the History of Mathematics Education Alexander Karp, Gert Schubring, 2014-01-25 This is the first comprehensive International Handbook on the History of Mathematics Education covering a wide spectrum of epochs and civilizations, countries and cultures. Until now much of the research into the rich and varied history of mathematics education has remained inaccessible to the vast majority of scholars, not least because it has been written in the language and for readers of an individual country. And yet a historical overview, however brief, has become an indispensable element of nearly every dissertation and scholarly

article This handbook provides for the first time a comprehensive and systematic aid for researchers around the world in finding the information they need about historical developments in mathematics education not only in their own countries but globally as well Although written primarily for mathematics educators this handbook will also be of interest to researchers of the history of education in general as well as specialists in cultural and even social history

Decolonizing Philosophies of Education

Ali A. Abdi, 2012-01-01 Philosophy of education basically deals with learning issues that attempt to explain or answer what we describe as the major questions of its domains i e what education is needed why such education and how would societies undertake and achieve such learning possibilities In different temporal and spatial intersections of people's lives the design as well as the outcome of such learning program were almost entirely indigenously produced but later they became perforce responsive to externally imposed demands where as far as the history and the actualities of colonized populations were concerned a cluster of de philosophizing and de epistemologizing educational systems were imposed upon them Such realities of colonial education were not conducive to inclusive social well being hence the need to ascertain and analyze new possibilities of decolonizing philosophies of education which this edited volume selectively aims to achieve The book should serve as a necessary entry point for a possible re routing of contemporary learning systems that are mostly of de culturing and de historicizing genre With that in mind the recommendations contained in the 12 chapters should herald the potential of decolonizing philosophies of education as liberating learning and livelihood praxes This collection of critical and scholarly analyses provides an insightful and timely resource for decolonizing philosophies of education that continue to shape discourses policies curricula and practices in all levels of educational and social institutions It also usefully challenges versions of postcolonial studies that fail to recognize and demystify the continuity of colonial hegemony in contemporary societal formations in both the global north and south Toh Swee Hin Distinguished Professor University for Peace Costa Rica Laureate UNESCO Prize for Peace Education 2000 Decolonizing philosophies of education edited by Ali A Abdi is a collection of twelve essays by noted scholars in the field who provide strong readings of postcolonialism in education with an emphasis on decolonizing epistemologies It provides a clear and comprehensive introduction to the critical history of colonization postcolonial studies and the significance of education to the colonial project This is an important book that provides a global perspective on the existential and epistemological escape from the colonial condition Michael A Peters Professor Educational Policy Studies University of Illinois at Urbana Champaign

Mathematics Education in East Africa Anjum Halai, Geoff Tennant, 2016-03-08 This Open Access book is a valuable resource for policymakers and practitioners as it brings insights mainly from developing countries where relatively less research activity takes place It is also a valuable resource for courses in mathematics education in the teacher education colleges and departments of education in the sub Saharan Africa region In the increasingly global and technological world mathematics is seen as a significant gatekeeper of opportunities for social and economic advancement and mobility Hence countries and development agencies in the broader sub Saharan Africa

region are looking towards increasing access to relevant and high quality secondary education as a lever towards economic development Policy makers and other key decision makers in education look towards improvement in mathematics teaching and learning as a key focus in education reform In the East Africa region also a number of initiatives have been taken at the national level in the respective countries to improve the quality of mathematics education This book provides an in depth comparative analysis of the developments and issues in mathematics education in Kenya Tanzania Rwanda and Uganda and advances our understanding of the state of secondary mathematics education in East Africa Lesotho Social Sciences Review ,2013-12 **Developing Sample Instructional Materials for a New Syllabus** Christine R. National Bibliography of Uganda ,2011 **The Orderly Entrepreneur** Catherine A. Honeyman,2016-09-14 The first generation of children born after Rwanda's 1994 genocide is just now reaching maturity setting aside their school uniforms to take up adult roles in Rwandan society and the economy At the same time Rwanda's post war government has begun to shrug off international aid as it pursues an increasingly independent path of business friendly yet strongly state regulated social and economic development The Orderly Entrepreneur tells the story of a new Rwanda now at the vanguard among developing countries emulating the policies of Singapore Korea and China and devoutly committed to entrepreneurship as a beacon for 21st century economic growth Drawing on ethnographic research with nearly 500 participants The Orderly Entrepreneur investigates the impact and reception of the Rwandan government's multiyear entrepreneurship curriculum first implemented in 2007 as required learning in all secondary schools As Honeyman shows entrepreneurship is more than a benign buzzword or hopeful panacea for economic development but a complex ideal with unique meanings across Rwandan society She reveals how curriculum developers teachers and students all brought their own interpretations and influence to the new entrepreneurship curriculum exposing how even a carefully engineered project of social transformation can be full of indeterminacies and surprising twists every step of the way **Syllabus** ,1992 *Education Sector Development Plan* ,1992 **Work for Justice** ,1996 **Teaching and Learning** ,2006 **Lesotho** ,2003 *Estimates of the Kingdom of Lesotho for the Year from ...
