101 Rules of Thumb for Sustainable Buildings and Cities Huw Heywood, 2019-07-25 People across the world are becoming more aware of the need for the buildings and cities they live and work in to be sustainable but the issue of how to be sustainable can seem a confusing and complex one These rules of thumb provide universal guidelines for the sustainable design of both buildings and the urban realm It s a global primer and textbook for anyone interested in understanding sustainability in the built environment an ideal starting point for students as well as an aide memoir for more experienced readers and practitioners interested in this field

101 Rules of Thumb for Low Energy Architecture Huw Heywood, 2019-07-25 101 Rules of Thumb sets out the essential elements of low energy architecture in a fresh intuitive way In an area where ever changing technology and complex legislation and can cloud the designer s thought processes this book encourages the designer to think clearly and intuitively about the fundamentals of low energy buildings With reliable simple

rules of thumb that will provide new ideas and refresh the designer's palette each page focuses on a single piece of advice or guidance along with a clear hand drawn illustration while there are also plenty of tips and more detailed information for those who wish to dig deeper The emphasis is on passive low energy principles and the rules of thumb cover all the design fundamentals from site and location to orientation and form peppered with some which will help the designer to think outside the box about the design process itself

Solar Energy Perspectives Cédric Philibert, 2011 In 90 minutes enough sunlight strikes the earth to provide the entire planet's energy needs for one year While solar energy is abundant it represents a tiny fraction of the world's current energy mix But this is changing rapidly and is being driven by global action to improve energy access and supply security and to mitigate climate change Around the world countries and companies are investing in solar generation capacity on an unprecedented scale and as a consequence costs continue to fall and technologies improve This publication gives an authoritative view of these technologies and market trends in both advanced and developing economies while providing examples of the best and most advanced practices It also provides a unique guide for policy makers industry representatives and concerned stakeholders on how best to use combine and successfully promote the major categories of solar energy solar heating and cooling photovoltaic and solar thermal electricity as well as solar fuels Finally in analysing the likely evolution of electricity and energy consuming sectors buildings industry and transport it explores the leading role solar energy could play in the long term future of our energy system

'One Planet' Cities David Thorpe, 2019-04-30 This book addresses the crucial question of how the essential needs of the growing human population can be met without breaking the Earth's already stretched life support system With four out of five people predicted to be urban dwellers by 2080 One Planet Cities proposes a pathway to genuine sustainability for cities and neighbourhoods using an approach based on contraction and convergence Utilising interviews with key players including the Global Footprint Network World Future Council WWF mayors and government officials and case studies from across the globe including Europe North and South America Australia South Africa China and India David Thorpe examines all aspects of modern society from food provision to neighbourhood design via industry the circular economy energy and transport through the critical lens of the ecological footprint and relevant supporting international standards and indicators Recommendations on managing supply chains and impacts how the transition to a world within limits might be financed and a deep examination of the Welsh Government's pioneering efforts follow It concludes with an imagined vision of what a genuinely sustainable future might be like and an appeal for one planeters everywhere to step up to the challenge This book will be of great interest to practitioners and policymakers involved in governance administration urban environments and sustainability alongside students of the built environment urban planning environmental policy and energy

Green Illusions Ozzie Zehner, 2012-06 We don't have an energy crisis We have a consumption crisis And this book which takes aim at cherished assumptions regarding energy offers refreshingly straight talk about what's wrong with the way

we think and talk about the problem Though we generally believe we can solve environmental problems with more energy more solar cells wind turbines and biofuels alternative technologies come with their own side effects and limitations How for instance do solar cells cause harm Why can't engineers solve wind power's biggest obstacle Why won't contraception solve the problem of overpopulation lying at the heart of our concerns about energy and what will This practical environmentally informed and lucid book persuasively argues for a change of perspective If consumption is the problem as Ozzie Zehner suggests then we need to shift our focus from suspect alternative energies to improving social and political fundamentals walkable communities improved consumption enlightened governance and most notably women's rights The dozens of first steps he offers are surprisingly straightforward For instance he introduces a simple sticker that promises a greater impact than all of the nation's solar cells He uncovers why carbon taxes won't solve our energy challenges and presents two taxes that could Finally he explores how future environmentalists will focus on similarly fresh alternatives that are affordable clean and can actually improve our well being Watch a book trailer [A Real Goods Solar Living Sourcebook](#) ,1996 *American Book Publishing Record* ,1997 *Subject Guide to Books in Print* ,2001
