Mathematics for Elementary School Teachers Tom Bassarear, 2001 The first and only text of its kind, *Mathematics for Elementary School Teachers 2e* offers a comprehensive content approach designed to foster hands-on, discovery-based mathematics instruction. Students first encounter new concepts through hands-on activities in the Explorations Manual, enabling them to construct their own understanding of the material. The text then serves as a resource for further investigation, explanation, and clarification. Unlike most texts which present exercises very similar to examples, Bassarear demonstrates how real-life problems are generally complex and often filled with ambiguity. Students learn that there may be more than one way to find an answer and even more than one answer.

With the latest research on what works best in teaching and learning, *The Mathematics Playbook* is your comprehensive guide to enhancing mathematics teaching and learning. With a focus on fostering equity and maximizing student learning, the authors provide practical modules that integrate the latest research on effective teaching practices and answer four critical questions: How do we foster nurture and sustain mathematics learning? Through real-life examples and an emphasis on self-assessment and reflection, this playbook empowers you to create engaging and impactful learning experiences in mathematics.
