Patterns Of Discovery In The Social Sciences:

Patterns of Discovery in the Social Sciences Paul Diesing, Social scientists are often vexed because their work does not satisfy the criteria of scientific methodology developed by philosophers of science and logicians who use the natural sciences as their model In this study Paul Diesing defines science not by reference to these arbitrary norms delineated by those outside the field but in terms of norms implicit in what social scientists actually do in their everyday work Patterns of Discovery in the Social Sciences is a detailed and systematic report on the full range of methods and procedures as they are actually practiced Neither a how to do it handbook nor a lofty philosophical treatise this is a truly interdisciplinary study of the basic modes of procedure in scientific inquiry with a special emphasis on normative politics Diesing treats scientific methods as inductive logics of discovery in continuous evolution He emphasizes the variety of methods available discusses the advantages and disadvantages of specific methods and in particular provides an account of mathematical modeling and of participant observation The book will be of immense interest to all working social scientists graduate students in any of the social science disciplines and philosophers of science It can also be employed as a text or supplement in courses in sociological methods and philosophy of science This book is also a noteworthy companion to Diesing s major work on Science and Ideology in the Policy Sciences Paul Diesing is professor emeritus of political science at the State University of New York at Buffalo He did his graduate studies in philosophy from the University of Chicago and has taught at that university the University of Illinois and the University of Colorado Diesing has also been a faculty associate at the Buffalo Center for International Conflict Studies where he participated in the Center s program of researching in bargaining theory and international crises He is the author of Reason in Society Five Types of Decisions and Their Social Conditions and Science and Ideology in the Policy Sciences
