## Diet & Physical Activity

To lose weight, a moderate reduction in caloric intake coupled with an increase in physical activity creates a modest and sustainable deficit.

Physical activity can help promote weight loss by increasing calorie burning, though to maintain weight, pay attention to your needs and stay at your energy need recommendations.

## Behavior Modifications

In order to maintain weight, you may need to change the habits that cause weight gain or loss in the first place. Identify behaviors of overeating, undereating and signs of the food police putting you down on what you do or don't eat.
