network due to the high penetration of distributed generation and increased power demand from the charging of electric vehicles. The energy and mobility transition hence calls for novel technological innovations in the field of sustainable electric mobility powered from renewable energy. This Special Issue focuses on recent advances in technology for PV charging and storage for electric vehicles.

Transitioning to Affordable and Clean Energy Edwin Constable, 2022-06-17

Transitioning to Affordable and Clean Energy is a collective volume which combines original contributions and review papers that address the question how the transition to clean and affordable energy can be governed. It will cover both general analyses of the governance of transition including policy instruments, comparative studies of countries or policies and papers setting out scientifically sound visions of a clean and just energy system. In particular, the following aspects are foregrounded: Governing the supply and demand side transformation; Geographical and cultural differences and their consequences for the governance of energy transitions; Sustainability and justice related to energy transitions, e.g. approaches for addressing energy poverty.

Transitioning to Affordable and Clean Energy is part of MDPI's new Open Access book series Transitioning to Sustainability. With this series MDPI pursues environmentally and socially relevant research which contributes to efforts toward a sustainable world. Transitioning to Sustainability aims to add to the conversation about regional and global sustainable development according to the 17 SDGs. The book series is intended to reach beyond disciplinary even academic boundaries.

Stakeholder Wellbeing and Value Creation Uday Salunkhe, D.N. Murthy, Bharath Rajan, Vaishali Patil, 2022-12-17

The relationship between firms and stakeholders is held together by a continuous two-way cycle of value creation. In this, how can value be managed such that the stakeholder's wellbeing is ensured? How does stakeholder wellbeing vary across business contexts? Are there varied perspectives in understanding stakeholder wellbeing? These and other pertinent questions have been addressed in this book. Particularly, this book provides a synthesis of research perspectives on value creation and stakeholder wellbeing through a collection of chapters from scholars in this area. It synthesizes research perspectives on value into three categories: firm-focused, customer-focused, and community-focused. In doing so, this book presents novel insights through these lenses and highlights best practices in ensuring stakeholder wellbeing. Responding to the rapidly changing business landscape where stakeholders are more connected, accessible, and informed than ever before, many firms are interested in creating value for all and in the process ensuring stakeholder wellbeing. This book will appeal to research scholars, practitioners, consultants, and managers looking to seek new insights and understanding on value creation.
