Some black cells contain a diagonal slash from top left to bottom right with numbers in them called the clues. A number in the top right corner relates to an across clue and one in the bottom left a down clue. The object of a kakuro is to insert digits from 1 to 9 into the white cells to total the clue associated with it. However no digit can be duplicated in an entry. Math riddles that make math exciting and engaging can teach kids the value of learning. They mix up the tired formula of worksheets while showing kids how they can apply math to their daily lives in unique ways. Letting kids figure out the answers to these puzzles teaches them problem solving skills that they can apply to all areas of life. It also allows them to feel the joy that comes with working hard on something and coming up with the correct solution. Providing gentle guidance towards the correct answer when your child is uncertain shows them that you are willing to take an active role in encouraging and supporting their education. Math riddles teach critical skills while encouraging cooperation and engagement from the whole family. Ready to get started? Click Buy Now.
