Discovering Forms and Form Templates

In InfoPath 2003, you can fill out a form or use the **Design mode** to create your own forms. When you fill out an InfoPath form, you will have different options, depending on the form's design. You can format the text you enter, insert tables and links, add optional sections, check for errors, and save the form to your computer. These options are defined by the form's designer.

When you create a form or design mode, you actually create a form template. This allows you to have control over the form's design. You can define the form's structure, default content, type of controls, data validation rules, views, as well as what other users can and cannot do. Note: You must have InfoPath 2003 installed on your computer in order to fill out InfoPath forms.
