Assessing House Prices in Canada Michal Andrle, Miroslav Plašil, 2019-11-15 This paper assesses house prices in 11 Canadian Census Metropolitan Areas CMA using the borrowing capacity and the net present value approaches. The results indicate that by the end of 2018 house prices in most metropolitan areas are aligned with macroeconomic fundamentals. However in Hamilton, Toronto and Vancouver house prices have increased beyond the values implied by the fundamentals.

World Bank East Asia and Pacific Economic Update, April 2025 Weltbank, 2025 East Asia and the Pacific remains one of the most dynamic regions in the world. Yet when measured against its own past performance and potential the region has underperformed. Growth in most economies and even output in several Pacific Island economies has not returned to pre-pandemic levels. Now rising global uncertainty is further dampening regional economic prospects. Uncertainty increases financing costs and hurts business and consumer confidence, inhibiting investment and consumption. However, short-term uncertainty should not obscure long-term trends in globalization, climate and demographics that will affect trade growth and jobs in the EAP region. These development challenges have been individually discussed in past Updates. But an integrated analysis may help policymakers take a longer view through the current fog of uncertainty of what ultimately matters and what needs to be done. This report illustrates the benefits of a synchronized three-pronged approach harnessing technological change, pursuing domestic reforms and deepening international cooperation.

Ireland International Monetary Fund, International Monetary Fund, Monetary and Capital Markets Department, 2022-11-09 The FSAP took place against the background of a fast-evolving financial sector in Ireland and heightened uncertainty in the global economy. The Irish financial landscape has undergone significant changes since the global financial crisis, with increasing divergence between an innovative and fast-growing international finance sector and the retail banking sector that has been consolidating and faces post-GFC operating restrictions and increasing competition from non-bank players. In the meantime, both the global pandemic and Brexit have left uneven marks across the economy, while there are risks from the unwinding of public support that has softened COVID-19's impact on the economy. Going forward, various ongoing and emerging risks such as persistent inflationary pressures fueled by supply bottlenecks and the war in Ukraine may impede recovery and magnify vulnerabilities to downside shocks.

Republic of Estonia International Monetary Fund. European Dept., 2023-07-28 Estonia has made remarkable progress over the past two decades achieving steady convergence towards more advanced EU economies However signs of erosion in external performance have emerged in recent years reflecting rapid growth in unit labor cost and real exchange

rate appreciation Russia's invasion of Ukraine triggered a large rise in inflation supply chain disruptions and slower growth in key trading partners in the Baltic region. In Estonia these developments combined with fiscal tightening in 2022 have led to a sharp economic downturn while deceleration in productivity has exacerbated competitiveness erosion. **OECD**

Economic Surveys: France 2024 OECD, 2024-07-10 France has faced two significant successive shocks: the COVID-19 pandemic and the increase in inflation. Emergency government measures were decisive in protecting business, jobs and purchasing power but at a high fiscal cost. Efforts to reduce public spending will be key to lower government debt. Lifting productivity growth hinges on a wider diffusion of digital technologies, reduced regulatory barriers and stronger innovation.
