### The New Patriarchs of Digital Capitalism

Ben Little,Alison Winch,2021-06-23 This book offers an original critique of the billionaire founders of US West Coast tech companies addressing their collective power influence and ideology their group dynamics and the role they play in the wider sociocultural and political formations of digital capitalism Interrogating not only the founders political and economic ambitions but also how their corporations are omnipresent in our everyday lives the authors provide robust evidence that a specific kind of patriarchal power has emerged as digital capitalism's mode of command The New Patriarchs examined over the course of the book include Sergey Brin and Larry Page of Google Elon Musk of Tesla Jeff Bezos of Amazon Mark Zuckerberg of Facebook and Peter Thiel We also include Sheryl Sandberg The book analyses how these mostly men legitimate their rapidly acquired power tying a novel kind of socially awkward but visionary masculinity to exotic forms of shareholding Drawing on a ten million word digital concordance the authors intervene in feminist debates on patriarchy masculinity and postfeminism locating the power of the founders as emanating from a specifically racialised structure of oppression tied to imaginaries of the American frontier the patriarchal household and settler colonialism This is an important interdisciplinary contribution suitable for researchers and students across Digital Media Media and Communication and Gender and Cultural Studies
