context in action **Organisational Space and Beyond** Karen Dale, Sytze F. Kingma, Varda Wasserman, 2018-06-14
 Through the focus on organizational space using the reception and significance of the seminal work on the subject by sociologist Henri Lefebvre this book demonstrates why and how Lefebvre's work can be used to inform and elaborate organisational studies especially in view of the current interest in the socio material dimension of organisations As the spatial turn in organisational research exposed the importance of spatial design in inducing power and cultural relations Lefebvre's perspective has become an inspiring theoretical framework However Organisational Space and Beyond explores how Lefebvre's work could be of a much wider relevance especially given his profound theoretical engagement with diverse schools of philosophical and sociological thought including Nietzsche Marx Sartre and Foucault This book brings together a range of authors that collectively develop a broader understanding of Lefebvre's relevance to organizational studies including areas of management concern such as strategy and diversity studies and ultimately draw on Lefebvre's work to rethink reimagine and reshape scholarship in organisational studies It will be of relevance to researchers academics students and organizational professionals in the fields of organisation studies management studies cultural studies architecture and sociology

The Future of Creative Workspaces Ozumcan Demir-Caliskan, 2023 **If These Walls Could Talk** Francois-Xavier de Vaujany, Emmanuelle Vaast, 2015 Organizational spaces project claims of organizational legitimacy while also constituting physical environments where work happens This research questions how organizational space and legitimacy are mutually constituted over time as organizations experience shifts in work and institutional demands Building on a qualitative case study of Paris Dauphine University a French university founded in the late 1960s that has since its inception occupied the former North Atlantic Treaty Organization headquarters we theorize the dynamic intersection of

organizational space and legitimacy over time The case study demonstrates how spatial practices of appropriation reappropriation and disappropriation intersect with and inform what we call spatial legacies that function to establish or repair an alignment between organizational space and legitimacy Spatial practices of appropriation and reappropriation build and manipulate spatial legacies whereas spatial practices of disappropriation attempt to break away from such legacies Appropriation and reappropriation involve managing spatial legacies to maintain the alignment between organizational space and legitimacy claims Disappropriation involves trying to erase or alter these legacies to realign the space to changing legitimacy claims This research adds to the literature on sociomateriality by adopting a longitudinal perspective that highlights legacies as nondeterministic outcomes of past imbrications of the social and the material to research on legitimacy by conceptualizing it as a sociomaterial construction and to research on organizational spaces by revealing the institutional underpinnings of spatial transformations This research also holds practical implications by highlighting the relationships between space as it is designed and used and an organization s legitimacy claims and by showing how claiming the immutability or flexibility of a space can be legitimizing for an organization

The Imagined Organization Monika Kostera,2020-05-29 This book represents a narrative quest for a symbolic grounding to help leaders in times when stable social structures and institutions dissolve and disappear Monika Kostera approaches this sense making process through innovative research methods collecting stories from participants and exploring plots and outcomes of an imagined meeting between two symbolic worlds one of the internal and imaginative and the other of the external and corporate

Time for Space Scott Taylor,André Spicer,2007 This paper presents an integrated framework for studying organizational spaces It suggests that existing research can be classed into three categories studies of space as distance studies of space as the materialization of power relations and studies of space as experience These approaches are drawn together using Henri Lefebvre s theory of spatial production to argue that an adequate understanding of organizational spaces would investigate how they are practised planned and imagined Moreover an adequate theory of space would account for multiple spatial levels or scales To illustrate the potential of the synthetic framework a reading of three exemplary studies of multiple organizational spaces from social anthropology and economic geography is presented The paper concludes by presenting a research agenda that indicates how data collection and analysis in established fields such as employee relations and international business might become more space sensitive by integrating such theorized cross scale analysis
