The Maasai adapt to these challenges by diversifying their livelihood strategy. There is limited insight into the potential effects and implications of milk sales as an alternative income activity. This book provides an in-depth assessment of the potential impact of milk sales on Maasai pastoralists. Based on extensive socio-economic information at olmarei household and enkaji sub-household levels, econometric methods are applied to estimate and assess the effect of milk sales on enkaji income and food security. In addition, gender roles in the research area and aspects of intra-olmarei dynamics are investigated and discussed.
