Second Edition is intended as a basic developmental reading text for preservice and in sevice teachers It has been our

experience in teaching undergraduate and graduate students in education that a developmental perspective of literacy

learning provides a helpful framework for understanding the process We have found that most textbooks on reading methods

are organized topically with chapters on word identification comprehension study strategies use of basal readers literature

and classroom organization *Becoming a Reader* is organized differently We use a stage model of reading development to

describe how children become skilled readers Specific topics such as word identification and comprehension are discussed

within this broader framework The text represents a synthesis of current thinking about how literacy is acquired We have

endeavored to produce a reader friendly text by providing concise descriptions of the various aspects of literacy learning and

instruction supplemented by examples and case studies To avoid overburdening the reader with lengthy literature reviews

have have cited only the most current and relevant sources to document and support the viewpoints presented As you read

the text bear in mind that we regard literacy learning as a language learning process that is best acquired through the

functional purposeful use of print The instructional methods we advocate reflect this basic premise
