Medicine Progress Test:

Written Assessment in Medical Education Hosam Eldeen Elsadig Gasmalla, Alaa AbuElgasim Mohamed Ibrahim, Majed M. Wadi, Mohamed H. Taha, 2023-03-11 This book is an indispensable yet simple reference for the daily use of a medical teacher. It addresses the needs of medical teachers interested in providing instruction and assessment in writing and written language offering detailed guidance in simple and straightforward language. The book goes beyond mere description; it provides many practical examples and valuable materials that can be utilized in training workshops and medical educator professional development courses. The book will be of interest to novice and experienced teachers in medical schools in addition to university teachers in other health professions such as dentistry, pharmacy, nursing, medical laboratory, physiotherapy, biomedical engineering, and veterinary medicine. *Advances in Medical Education* A.J.J.A. Scherpbier, Cees P.M. van der Vleuten, J.J. Rethans, A.F.W. van der Steeg, 2012-12-06 About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht. We received 525 abstracts for the conference, divided in thematic poster sessions and platform presentations. Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences. During and after the conference about 250 papers were submitted for publication in the conference proceedings, leaving us little time for a post-conference depression. Despite the large number of papers, the editors have attempted to review and edit the papers as carefully as possible. Occasionally, however, correspondence exceeded reasonable deadlines, preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished, we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to occasionally tedious editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flippo Berger whose expertise with desktop publishing and perseverance was a great help. *Lessons from Problem-based Learning* H. J. M. van Berkel, 2010 Problem-based learning (PBL) has excited interest among educators around the world for several decades. Among the most notable applications of PBL is the approach taken at the Faculty of Health Medicine and Life Sciences (FHML) at Maastricht University, the Netherlands. Starting in 1974 as a medical school, the faculty embarked on the innovative pathway of problem-based learning, trying to establish a medical training program which applied recent insights of education which would be better adapted to the needs of the modern physician. The medical school, currently part of the FHML, can be considered as an established school where original innovations and educational changes have become part of a routine. The first book to bring this wealth of information together, *Lessons from Problem-based Learning*, documents those findings and shares the experiences of those involved to encourage further debate and refinement of problem-based learning in specific applications elsewhere and in general educational discussion and thought. Each chapter provides a description of why and

what has been done in the Maastricht program followed by reflection on the benefits and issues that have arisen for these developments The final section of the book examines the application of PBL in the future and how it is likely to develop further
