Federation over the Web Klaus P. Jantke, Aran Lunzer, Nicolas Spyrtos, Yuzuru Tanaka, 2006-01-19 The lives of people all around the world especially in industrialized nations continue to be changed by the presence and growth of the Internet. Its influence is felt at scales ranging from private lifestyles to national economies boosting the pace at which modern information and communication technologies influence personal choices along with business processes and scientific endeavors. In addition to its billions of HTML pages the Web can now be seen as an open repository of computing resources. These resources provide access to computational services as well as data repositories through a rapidly growing variety of Web applications and Web services. However people's usage of all these resources barely scratches the surface of the possibilities that such richness should offer. One simple reason is that given the variety of information available and the rate at which it is being extended it is difficult to keep up with the range of resources relevant to one's interests. Another reason is that resources are offered in a bewildering variety of formats and styles so that many resources effectively stand in isolation. This is reminiscent of the challenge of enterprise application integration familiar to every large organization be it in commerce, academia or government. The challenge arises because of the accumulation of information and communication systems over decades typically without the technical provision or political will to make them work together. Thus the exchange of data among those systems is difficult and expensive and the potential synergistic effects of combining them are never realized.

Year Of The Rat Jorah Kai, 2023-02-01 THE YEAR OF THE METAL RAT 2020 was a time of panic, uncertainty and great division. CHINA, VIETNAM, CANADA, SAUDI ARABIA, ITALY, ARGENTINA, AMERICA, JAPAN, AUSTRALIA, PHILIPPINES, NETHERLANDS, GUATEMALA, UGANDA, THE U.K., SINGAPORE, RUSSIA. As the pandemic spread, some wore masks and socially distanced to protect the vulnerable while others protested all public health measures as a form of tyranny and caused loud and obnoxious mass disruptions to critical infrastructure in a jarring display of personal freedom. Fake news and echo chambers enabled alternative facts while unhinged narratives and cartoonish conspiracies ran rampant, often trumping coverage of legitimate and existential converging catastrophes. In YEAR OF THE RAT, the sequel to the international best seller *The Invisible War*, Kai's Diary Jorah Kai documents the world's largest Zero Covid bubble while the outside world handles the pandemic uniquely. Reaching out to friends across the globe, he weaves their stories together. Thirty-six writers from 33 cities in 16 countries share their daily struggles, hopes and fears for the YEAR OF THE RAT as the SARS-CoV-2 virus spreads catastrophe to every corner of the globe. It's the metaphor of the yin and the yang. I'd say right now we are in the yin. It's a kind of disaster. It's sad. And on the yang side, it looks like some sort of a mathematical balance that I cannot explain. JCVD, I would have done the whole thing for a donut and a tuna fish sandwich. The money meant nothing. It was the opportunity to at least prove to myself that I wasn't a liar, that I wasn't living a life of disillusionment. When you think of yourself as being a very creative person and turn around and realize you've been leading a
