escritor best seller internacional Johann Hari fez uma jornada para descobrir as razões por trás da diminuição do nosso tempo de atenção. Ele entrevistou os maiores especialistas mundiais em foco e descobriu que tudo o que pensamos sobre o assunto está equivocado. Acreditamos que nossa incapacidade de focar é uma falha pessoal, mas não. Todos nós estamos sob a influência de poderosas forças externas. Ou seja, nosso foco está sendo roubado. Como Hari explica com tanto cuidado, estamos enfrentando uma crise de atenção. Rolamos os feeds sem parar, sem pensar, sem nos atentarmos às tarefas cotidianas. Por quê? Ao longo das páginas, Hari expõe os doze fatores externos principais que estimulam esse comportamento, desde as grandes empresas de tecnologia até a poluição e muito mais. O livro também traz reflexões para nos ajudar a fazer mudanças pessoais e também aborda os riscos para a sociedade, conforme somos cada vez mais privados do nosso foco e a nossa atenção cada vez mais manipulada. Em uma jornada emocionante que vai de dissidentes do Vale do Silício até uma comunidade no Rio de Janeiro, Johann Hari mostra que há saídas, como um escritor na Nova Zelândia que encontrou uma maneira notável de restaurar nossa atenção. O LADO BOM DAS EXPECTATIVAS. Combinando neurociência com uma narrativa gil e envolvente, o jornalista David Robson nos convida para um passeio pelas mais modernas pesquisas científicas que apontam que nossas expectativas moldam nossa experiência e nos leva a mergulhar profundamente nas muitas realidades da vida afetadas por essa mentalidade, claro que não vamos ficar mais magros, mais felizes ou mais saudáveis com a força do pensamento, mas podemos rever e reformular muitas facetas diferentes da nossa vida.

Dieting, Overweight and Obesity Wolfgang Stroebe, 2022-07-26 Why do so many people become overweight and obese and why do they find it so difficult to lose weight? In this second edition of his influential book on Dieting, Overweight and Obesity, Wolfgang Stroebe, who developed the goal conflict model of eating, explores the physiological, environmental, and psychological influences on weight gain and examines how these processes are affected by genetic factors. Like the first edition, the book takes a social cognitive approach to weight regulation and discusses how exposure to environmental cues can set off overeating in chronic dieters. In addition to extensively revising and updating the chapters of the first edition, this second edition features three new chapters. The chapter on successful restrained eating reviews personality factors as well as recent experimental research on impulse control. The chapters on psychological treatment of obesity and on primary prevention describe and evaluate the various treatment and prevention approaches and the research conducted to assess their efficacy. This book is essential reading for students, researchers, and clinicians interested in an up-to-date review of the field of eating research and a new theoretical approach to the study of overweight and obesity.
