Solidarities with the Non/Human, or, Posthumanism in Literature Stefan Herbrechter,2024-11-18 This volume collects essays written over the last decade by one of the founders and leading figures of the theoretical movement of critical posthumanism The readings of literary texts gathered here from Shakespeare Keats Camus Vittorini Kundera Haushofer Atwood Eagleman Crace and DeLillo focus on posthumanist moments in which questions of postanthropocentrism and the nonhuman become prominent are negotiated and ultimately foreclosed They show how a deconstructively minded way of reading humanistically motivated texts can help making these texts relevant for our so called posthuman times In doing so these critical posthumanist readings demonstrate that literature remains one of the privileged cultural institutions and practices from which solidarities both with and between the human and nonhuman can be formed and negotiated

Microbes: The Foundation Stone of the Biosphere Christon J. Hurst,2021-05-01 This collection of essays discusses fascinating aspects of the concept that microbes are at the root of all ecosystems The content is divided into seven parts the first of those emphasizes that microbes not only were the starting point but sustain the rest of the biosphere and shows how life evolves through a perpetual struggle for habitats and niches Part II explains the ways in which microbial life persists in some of the most extreme environments while Part III presents our understanding of the core aspects of

microbial metabolism Part IV examines the duality of the microbial world acknowledging that life exists as a balance between certain processes that we perceive as being environmentally supportive and others that seem environmentally destructive In turn Part V discusses basic aspects of microbial symbioses including interactions with other microorganisms plants and animals The concept of microbial symbiosis as a driving force in evolution is covered in Part VI In closing Part VII explores the adventure of microbiological research including some reminiscences from and perspectives on the lives and careers of microbe hunters Given its mixture of science and philosophy the book will appeal to scientists and advanced students of microbiology evolution and ecology alike
