first law of thermodynamics problem solving khan academy - Jan 10 2023

web davide ghazal 8 years ago you had to find the heat since the work is positive work done on the system and you know that the change in internal energy is negative the average kinetic energy of the gas molecules is lower than it previously was then you are expected to get a negative q heat lost comment 3 votes upvote downvote

web 4 5 when heat flows from the reservoir to the ice the internal mainly kinetic energy of the ice goes up resulting in a

higher average speed and thus an average greater position variance of the molecules in the ice the reservoir does become more ordered but due to its much larger amount of molecules it does not offset the change in

solving thermodynamics problems simon fraser university - Oct 07 2022

web solving thermodynamics problems solving thermodynamic problems can be made significantly easier by using the following procedure 1 summarize given data in own words leave out unneeded information 2 clearly understand identify what is being asked for draw a sketch showing interactions states and identify a solution strategy
