University Rankings William Yat Wai Lo,2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan s higher education system It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan s higher education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global

The College Board Review, 1997 [The Review of reviews](#), 1896 *Understanding Teacher Education in Contentious Times* Catherine Cornbleth, 2013-10-30 *Understanding Teacher Education in Contentious Times* examines how public, professional, and private or corporate agencies operate to shape teacher education and possibilities for its improvement. Teacher education programs, particularly those leading to state certification or licensure, are influenced not only by state regulations but also by required review and accreditation by an outside agency such as the National Council for the Accreditation of Teacher Education and are subject to various contextual pressures such as the cultures of the institutions that host them and their surrounding communities, their potential student and employer markets, strong individuals, professional organizations, history, or tradition, and increasingly external, usually privately funded, special interest corporations such as the National Council on Teacher Quality. Unique among books on teacher education, this volume interweaves its historical context, including emerging trends, the complex contexts in which practice and reform efforts take place, and are supported or impeded.
