### **Beyond the Screen**

Frank A. Aycock, 2025-11-26. Written in an accessible style, this book explores the complex future of television across its different industries, providing professional producers with key insights and pathways to adapt and prepare. By exploring traditional media industries and how they have come to make up today's streaming and broadcasting media world, the text provides a detailed discussion of the future of systems programming and television viewing. This includes a wide range of topics such as internet protocol television (IPTV), set top boxes (STBs), ATSC 3.0, virtual reality (VR), holographic television, and artificial intelligence (AI) as well as other cutting edge technologies. Additionally, this book examines the future of content monetization by exploring the new and sometimes controversial ways of advertising, product placement, and search and promotion that will be required to be financially successful in this future television environment.

*Writing, Communication and Narrative Skills for Medical Scientists Before and After the COVID Era* Gian Carlo Di Renzo, 2021-12-01. When the COVID 19 pandemic occurred, all the main communication systems of medical research have undergone an epochal change. Many online journals and magazines have tried to publish inherent works of this specific problem as soon as possible, soliciting and preferring them to others, thus changing the system of free acceptance of scientific works once. Moreover, the way to communicate these works has no longer occurred through standard Scientific Congresses but with other systems: websites, streaming, and webinars or virtual conferences. Now there is something systematic missing, which foresees that this may last in the future in the post COVID 19 era. AC the communication system of the medical sciences will be different from now on. There will be far fewer classical style conferences like the ones so popular before COVID 19 outbreak. BC but there will be more webinars in streaming and virtual conferences. This new book fits well in this period, creating a bridge between those who do research and how it is communicated, what are the classic communication methods and what is all the necessary background to communicate with new tools. The book idea is based on the legacy left by Michael Faraday, the famous American chemist, who sensed how communicating what happens in science can make the
