

Intermittent Fasting

Stage 1: Right After Eating

- Carbohydrates from food are converted into glucose (sugar) and released into the bloodstream.
- Blood sugar level rises.
- Insulin stimulates the conversion of glucose into glycogen as energy storage.

Stage 2: 3 Hours After Eating

- While insulin works, blood sugar level drops.
- In a non-fasting state, glycogen is used as energy.
- Excess glycogen that is not used is stored in the body as fats.

Stage 3: 9 Hours After Eating

- As blood sugar levels continue to drop, the body reacts by converting glycogen back into glucose and releasing it into the bloodstream.
- Fat is not yet used as an energy source, as there is still glucose and glycogen available.

Stage 4: 11 Hours After Eating

- Now that the stored glycogen has been almost used up, a metabolic switch is flipped.
- Fat is burned as it is used as energy.

Stage 5: 14-16 Hours After Eating

- As fat-burning continues, fatty acids are converted into ketones via ketosis.
- Ketones provide energy to the brain, heart and other vital organs.

Eat Stop Eat. Intermittent Fasting Diet to Have More Energy and Lose Weight (with the Best Recipes) Mary Nabors,2021 **2, 4, 6, Eat** Stephanie O'Dea,2020-07-21 When I first heard of intermittent fasting through a Pinterest post in 2017 I assumed that it too was going to be a waste of my time and that it was pretty much just a starvation diet I've done those in the past and was miserable every step of the way Also From my own experience and those of my friends starvation diets didn't work That said I am and always have been a sucker for the next new and shiny diet plan so I gave it a try for 3 days PS this is usually how I do things I go all on board for 3 days and then I crash and burn Anyhow I didn't do a lick of research before diving straight in with a 4 hour eating window that I decided should only be between 12 noon and 4 pm I decided that I was going to have coffee with a bit of spackle powdered creamer in it for breakfast and chicken broth for lunch Any time I felt hungry through the day and it was ALL DAY hunger I would have a cup of Bengal Spice cinnamon flavored tea or a mug of chicken broth In my eating window I would eat a healthy dinner of about 1000 calories I didn't allow myself to have any sugar or anything fun to eat I white knuckled it through my 3 days I now know what I did wrong and how if you do it correctly intermittent fasting is actually pretty darn easy to stick with in the long term I've now been at it for over a year and the stubborn 10 pounds that have plagued me my entire adult life have slowly disappeared and stayed away I get it that this sounds way too good to be true and you're likely to be skeptical If you want to get into more of the science-y stuff of how this all works without simply being a starvation diet then I urge you to do some research on your own If you are still with me this is how you do it [The Handbook of Intermittent Fasting - Effective Solutions for Weight Loss & Muscle Definition](#) Idai Makaya,2009-10 Idai Makaya a British Martial Arts Conditioning Expert and Magazine Columnist presents his take on Intermittent Fasting regimes for weight loss improved health and muscle definition Intermittent fasting involves short planned spells of calorie restriction to train the body to burn fat and preserve muscle tissue The concept is not new but it's not well known either Makaya covers old and new methods of Intermittent Fasting which will suit everyone in reaching their ideal body shape and weight This handbook explains why Intermittent Fasting works so well and details the numerous scientifically proven benefits this practice has on health and longevity

The Complete Guide to Intermittent Fasting

Charlie Mason,2017-10-31 If you need to lose weight look great reduce inflammation boost your immunity or a myriad of other benefits then you should consider one of the various intermittent fasting methods There are different forms of intermittent fasting so if you want to fast responsibly then you should find the type of fasting that suits you best For instance there is the 16 8 fasting where you fast for 16 hours and then eat your meals within the remaining 8 hours Then there is the alternate day fast where you fast on one day and eat normally the next You may also choose the extended fast where you fast for a longer period of time such as 8 days or more Traditional fasting has proven to be ineffective with many people unable to cope with the tough requirements Ordinarily people would fast from dawn to dusk for probably an entire month having to endure days on end without proper meals Then once the benefits of fasting are achieved they would resume normal life only for the problems to creep back again This can be very frustrating Fortunately intermittent fasting solves this challenge Rather than go through lengthy periods of fasting all you need to do is identify the most suitable intermittent type of fasting For instance you may choose the 16 8 format where you go for 16 hours without eating anything and only eat within an 8 hour window in any given day Fortunately the 16 hours of fasting include your sleeping time so you will be asleep for about half of that time Intermittent fasting has gained popularity because it offers choice is easy to handle and has a lot of benefits but without the rigors and disadvantages of traditional ways of fasting If you need to lose weight look great reduce inflammation boost your immunity or a myriad of other benefits then you should consider one of the various intermittent fasting methods
