## **Pamphlet Architecture 26 Thirteen Projects For The Sheridan Expressway:**

**Pamphlet Architecture 26** Jonathan D. Solomon, 2013-07-02 The thirteen projects take as their subject a site of contested transportation infrastructure the Sheridan Expressway By proposing new typologies for this site these studies seek to mediate the spaces in the city where local and regional meet Referencing the introduction of the modern parkway into the Bronx the grading of the Central Park transverse roads and other works that have redefined the relationship between parks and roads author Jonathan Solomon suggests a system by which large projects might again be built in American cities

Aspects of Urbanization in China Gregory Bracken, 2012 China's opkomst als wereldmacht is een van de ingrijpendste gebeurtenissen van deze tijd Honderden miljoenen mensen zijn de armoede ontvlucht dankzij de snelle industrialisatie van het land De wonderbaarlijke economische groei van China heeft zijn nadelen iets wat vaak het meest pijnlijk duidelijk wordt in de steden Deze studie is geschreven door wetenschappers uit verschillende disciplines waaronder architectuur stedenbouw sociale wetenschappen aardrijkskunde en antropologie Een deel van de auteurs behandelt de mondiale ambities van de steden terwijl andere hun culturele en architecturale uitingen onderzoeken

**Pamphlet Architecture 9: Rural and Urban House Types** Steven Holl, 1982 Holl focuses on a collection of peculiarly American house types These building forms exhibit a simplicity and integrity of construction and expression that link folk to modern architecture and they offer a framework for thinking about alternatives to suburban tract housing

*Pamphlet Architecture 27: Tooling* Benjamin Aranda, Chris Lasch, 2006 We all know that today's architectural design has moved from the sketchpad to the screen the era of the Mayline and the drafting board now seems downright Paleolithic but techniques for using the computer not just as a tool for rendering but as a generative instrument remain woefully unexplored The technologically progressive young firm Aranda Lasch illustrates how advanced computational methods and algorithmic codes can be used to foster architectural design Tooling explores patterns generated by computer codes that in turn create an organizational template assembling projects By openly sharing these codes the authors seek to foster further investigation into their methods allowing other architects to model and evolve more critical and insightful geometries and patterns

**Pamphlet Architecture 31** Steven Holl, 2013-07-02 Holl attempts to answer these questions with his idea for Dense Pack Villages a type of courtyard housing that could be built with recycled concrete from fallen buildings and steel and would be hurricane and earthquake resistant Each village could house approximately 200 occupants and the courtyards would be filled with greenery and fruit trees Holl proposes that these houses use solar cells on their roofs to provide electricity allowing the villages to potentially operate off the grid Water can be supplied from desalinization plants in each village and also from new reservoirs replacing the outdated reservoirs that were destroyed in the earthquake

*Decoration* Emily Abruzzo, Jonathan D. Solomon, 2006-09-14 With *Decoration* the long running architecture journal 306090 enters a new era as it evolves into full color book format In this milestone volumemixing contemporary building projects with commentary and criticism from across the ideological spectrum

as well as interviews studio profiles and student work 306090 takes on one of the very last taboos of contemporary architecture decoration Daring to discuss a phenomenon that surrounds us but has been quietly ignored or dismissed by theorists and critics in the better part of the twentieth century Decoration addresses emerging trends in design planning landscape and education Contributors to this landmark installment include Jesse Reiser Kent Bloomer Kengo Kuma Nina Rappaport and Meredith Warner

**Models** Jonathan D. Solomon, Emily Abruzzo, Eric Ellingsen, 2008-01-03 Models are an essential component of the architect's design process As tools of translation models assist the exploration of the possible and illustrate the actual While models have traditionally served as representational and structural studies they are increasingly being used to suggest and solve new spatial and structural configurations Models the eleventh volume of the highly regarded journal 306090 explores the role of the architectural model today in relation to the idea the diagram the technique and the material Models includes contributions from engineers scientists poets painters photographers historians urbanists and architects both young and experienced

**Dimension** Daniel Eatock, Emily Abruzzo, Jonathan D. Solomon, 2008-08-04 306090 has emerged as an essential forum for issues of architectural practice and theory Each volume addresses a pressing issue and offers diverse cross disciplinary solutions in the form of projects ideas buildings and other media Dimension 306090 12 reconsiders the act of measurement and definition in architectural design practice Architecture in the past two decades has been transformed by the ongoing revolution in digital design and fabrication techniques Dimension explores how the data design and invention derived from the act of measurement can help architects respond to economic political and environmental factors
