Women's Health Sheryl Burt Ruzek, Virginia L. Olesen, Adele

E. Clarke, 1997 How well do national agendas address all women's health care priorities? What are the implications for social action? Particular attention is paid in this collection of essays to how race, class, gender, and culture shape and in turn are shaped by treatment options and health care for certain subpopulations among Native American, Latina, Asian American, and African American women. Discussions of reproductive health, mental health, violence, and the treatment of stigmatized women raise perplexing issues about choice, chance, and social change.

Monthly Catalog of United States Government Publications United States. Superintendent of Documents, 1994

U.S. Women's Interest Groups Sarah Slavin, 1995-12-11

No other reference analyzes the origins, development, programs, publications, and political action of 180 major American organizations concerned with women's issues in such depth. Over 100 experts give an overview of how national women's groups of all kinds and representing varied and broad segments of society have had an impact on a wide array of public policy issues in Washington in recent years. An introduction provides a content analysis, general background, and historical sketch for the profiles, which are arranged alphabetically. An appendix describes six government agencies of primary importance in handling women's issues as agenda setters and bridges. A second appendix consists of the questionnaire which was sent to each organization covered in the volume. The alphabetically arranged profiles cover organizations with all types of goals and concerns: different racial and ethnic identification, church and temple affiliations, civil, elderly, professional, and occupational associations, social and sorority groups, labor and business organizations, not for profit and for profit groups, research centers, and both partisan and nonpartisan organizations. Students, teachers, professionals in governmental and nongovernmental agencies, researchers, and citizen activists will find that this handy sourcebook is a treasury of authoritative information about how private citizens work to affect national policy and legislation in essential ways.

New Dimensions in Women's Health Linda Lewis Alexander, Judith H. LaRosa, 1994

This dynamic text comprehensively examines dimensions of Women's health. The 1990s have identified women's health as a critical new frontier in health education. This book takes neither a traditional nor feminist approach to women's health. It is a data-driven, contemporary combination of both approaches with an emphasis on informed personal decision making. The book offers a scientific review of women's health issues from epidemiological, historical, legal, social, and clinical perspectives. The concept of Consumerism is stressed throughout the spectrum of women's health issues. Based on scientific data and clinical findings, this book is referenced with the most current information and data available. The text is ideal for courses focusing on women's studies in health education, nursing, allied health, and psychology.

Special Features: clinically accurate assessment of the issues, sensitivity to, and discussion of the full spectrum of factors that contribute to the issues, ethnic, psycho-social, political, legal, etc. format helps structure students' analytical and personal decision-making skills.
