When the Chips Are Down Pranay Kotasthane, Abhiram Manchi, 2023-11-18

To the world at large, technology was synonymous with software. Within months, the subject of such conversations has changed dramatically. Today, the hardware that runs all software, semiconductors or chips, has become a subject of WhatsApp groups and international politics. The chip shortage during COVID-19 made governments take notice of this complex supply chain. The US began denying advanced semiconductors to Chinese companies. Worsening China-Taiwan relations further intensified the debate. By 2022, China, the US, India, the EU, and Japan had released plans worth billions of dollars for setting up new semiconductor facilities. This book is a comprehensive overview of this meta-critical technology. How are semiconductors important from a geopolitical perspective? Why did the US and Taiwan become powerhouses in this domain while Russia and India fell behind? Is China's semiconductor sector a threat to the world? What are the future trends to watch out for? These are the questions that this book answers.

The 21st Century in 100 Games Aditya Deshbandhu, 2024-06-20

The 21st Century in 100 Games is an interactive public history of the contemporary world. It creates a ludological retelling of the 21st century through 100 games that were announced, launched, and played from the turn of the century. The book analyzes them and then uses the games as a means of entry to examine both key events in the 21st century and the evolution of the gaming industry. Adopting a tri-pronged perspective, the reviewer, the academic, and the industry observer, it studies games as ludonarratological artefacts and resituates games in a societal context by examining how they affect and are engaged with by players, reviewers, the gaming community, and the larger gaming industry. This book will be a must-read for readers interested in video games, new media, digital culture, and history.
