## **Pamphlet Architecture 27 Tooling:**

Pamphlet Architecture 27: Tooling Benjamin Aranda, Chris Lasch, 2006 We all know that today's architectural design has moved from the sketchpad to the screen the era of the Mayline and the drafting board now seems downright Paleolithic but techniques for using the computer not just as a tool for rendering but as a generative instrument remain woefully unexplored The technologically progressive young firm Aranda Lasch illustrates how advanced computational methods and algorithmic codes can be used to foster architectural design Tooling explores patterns generated by computer codes that in turn create an organizational template assembling projects By openly sharing these codes the authors seek to foster further investigation into their methods allowing other architects to model and evolve more critical and insightful geometries and patterns

**Pamphlet Architecture 30** InfraNet Lab / Lateral Office, 2013-07-02 Participants in the Pamphlet Architecture 30 competition were asked to respond to the theme Investigations in Infrastructure and propose new directions for architecture transportation energy cities and agriculture at a continental scale The winning entry Coupling imagined six daring projects a high speed rail system across the Bering Strait that also collects freshwater from the seasonal iceshelf a decommissioned airport transformed into a geothermal data farm and agriculture site thickening on off ramps around big box stores into circular parking lots a call to include landfills in the list of preserved open spaces and a saline terminal lake turned into a water farm recreational retreat and habitat haven Coupling argues that infrastructures behave as artificially maintained natural systems Rather than a New Deal approach of massive engineering or iconic infrastructure Coupling employs adaptable responsive small scale interventions whose impacts are global in scale

**Pamphlet Architecture 31** Steven Holl,2013-07-02 Holl attempts to answer these questions with his idea for Dense Pack Villages a type of courtyard housing that could be built with recycled concrete from fallen buildings and steel and would be hurricane and earthquake resistant Each village could house approximately 200 occupants and the courtyards would be filled with greenery and fruit trees Holl proposes that these houses use solar cells on their roofs to provide electricity allowing the villages to potentially operate off the grid Water can be supplied from desalination plants in each village and also from new reservoirs replacing the outdated reservoirs that were destroyed in the earthquake **Pamphlet**
