Barons Austin Frerick, 2025-09-02 Now with a new chapter on the Distribution Barons Best Books of 2024 Frerick's prose throughout is both direct and masterfully controlled with every point supported by extensive references and notes. This is no alarmist screed but rather a careful, systematic and utterly damning demolition job an exquisitely informed expos. A genuinely revelatory look at mass food production in the United States Kirkus Reviews starred. In this eye opening debut study Frerick an agricultural policy fellow at Yale University reveals the ill gained stranglehold that a handful of companies have on America's food economy. It's a disquieting critique of private monopolization of public necessities. Publishers Weekly starred. Barons is the story of eight titans of the food industry their rise to power and the consequences for workers eaters and democracy itself. Readers will meet a secretive German family that took over the global coffee industry in less than a decade relying on wealth traced back to the Nazis to gobble up countless independent roasters. They will visit the Disneyland of agriculture where school children ride trams through mechanized warehouses filled with tens of thousands of cows that never see the light of day. And they will learn that in the food business crime really does pay especially when you can bribe and then double cross the president of Brazil. Barons paints a stark portrait of corporate consolidation but it also shows that a fair healthy and prosperous food industry is possible if we take back power from the barons who have robbed us of it.

[Exploring Intelligent Decision Support Systems](#) Rafael Valencia-García, Mario Andrés Paredes-Valverde, María del Pilar Salas-Zárate, Giner Alor-Hernández, 2018-02-07 This book presents innovative and high quality research regarding advanced decision support systems (DSSs). It describes the foundations, methods, methodologies, models, tools and techniques for designing, developing, implementing and evaluating advanced DSSs in different fields including finance, health, emergency management, industry and pollution control. Decision support systems employ artificial intelligence methods to heuristically address problems that are cannot be solved using formal techniques. In this context, technologies such as the Semantic Web, linked data, big data and machine learning are being applied to provide integrated support for individuals and organizations to make more rational decisions. The book is organized into two parts. The first part covers decision support systems for industry while the second part presents case studies related to clinical, emergency management and pollution control.

[Growing Gardens, Building Power](#) Justin Sean Myers, 2022-10-14 Across the United States marginalized communities are organizing to address social, economic and environmental inequities through building community food systems rooted in the principles of social justice. But how exactly are communities doing this work? Why are residents tackling these issues through food? What are their successes and what barriers are they encountering? This book dives into the heart of the food justice movement through an exploration of East New York Farms ENYF one of the oldest food justice organizations in Brooklyn and one that emerged from a bottom up asset oriented development model. It details the food inequities the community faces and what produced them how and why residents mobilized to turn vacant land into community gardens and the struggles the

organization has encountered as they worked to feed residents through urban farms and farmers markets This book also discusses how through the politics of food justice ENYF has challenged the growth oriented development politics of City Hall opposed the neoliberalization of food politics navigated the funding constraints of philanthropy and the welfare state and opposed the entrance of a Walmart into their community Through telling this story Growing Gardens Building Power offers insights into how the food justice movement is challenging the major structures and institutions that seek to curtail the transformative power of the food justice movement and its efforts to build a more just and sustainable world
