The accuracy of tracking was one of the key components for fitness tracking with some devices performing better than others. Accuracy in the tracking of daily activities such as walking, running, and sleeping is important. This research showed subjective and objective experiment results which were used to compare the accuracy of four wearable devices in conjunction with user-friendliness. Satisfaction levels, the accuracy of tracking, and the opinion of each subject while using a wearable device to track their daily activity were compared. The results determined that the most effectiveness was the Withings Pulse, followed by the Fitbit Flex, Jawbone Up24, and Misfit Shine.

Applying GPS Data to Understand Travel Behavior
Jean Louise Wolf, William H. Bachman, Marcelo Simas Oliveira, Joshua A. Auld, Abolfazl Mohammadian, Petr Samuilovich Vovsha, 2014. TRB's National Cooperative Highway Research Program (NCHRP) Report 775: Applying GPS Data to Understand Travel Behavior. Volume I: Background, Methods, and Tests describes the research process that was used to develop guidelines on the use of multiple sources of Global Positioning System (GPS) data to understand travel behavior and activity. The guidelines, which are included in NCHRP Report 775 Volume II, are intended to provide a jump start for processing GPS data for travel behavior purposes and provide key information elements that practitioners should consider when using GPS data.

Wearable Technology. The usability of the Apple Watch 2 Series and its impact on society
Harry Mwololo, 2018-01-29. Scientific Essay from the year 2017 in the subject Communications. Multimedia. Internet. New Technologies. Egerton University. Language: English. Abstract: Wearable technologies such as Apple Watch Series 2 have created a significant impact on the manner in which people track their fitness and personal health. Apple

Watch Series 2 has been a significant device in the wearable technology market. Apart from provision of basic health features, the technology offers other daily operations features like payments, navigations and information sharing for both personal and business use. To examine the technology, the paper focused on exploring the usefulness of the Apple Watch 2 series, its impact to society and IT sector, and other technologies that are competing with Apple Watch 2. The writer, through this comparison, was able to provide his opinion on the technology and also conclusion of the same technology. The paper concluded that Apple Technology is a beneficial technology to the users because of its quality and efficient features that offer the user health benefits as well as other personal life tracking benefits. However, for users who might not need all the features in the Watch, it is convenient to use other technologies such as Fitbit and the other basic fitness brands.
