**Exploration of the Valley of the Amazon** William Lewis Herndon,Lardner Gibbon,1854 *The Fundamental Principles of Finance* Robert Irons,2019-07-25 Finance is the study of value and how it is determined Individuals small businesses and corporations regularly make use of value determinations for making strategic decisions that affect the future outcomes of their endeavors The importance of accurate valuations cannot be overestimated valuing assets too highly will lead to investing in assets whose costs are greater than their returns while undervaluing assets will lead to missed opportunities for growth In some situations such as a merger or an acquisition the outcome of the decision can make or break the investor The need for solid financial skills has never been more pressing than in today s global economy The Fundamental Principles of Finance offers a new and innovative approach to financial theory

The book introduces three fundamental principles of finance that flow throughout the theoretical material covered in most corporate finance textbooks. These fundamental principles are developed in their own chapter of the book then referred to in each chapter introducing financial theory. In this way the theory is able to be mastered at a fundamental level. The interactions among the principles are introduced through the three precepts which help show the impact of the three principles on financial decision making. This fresh and original approach to finance will be key reading for undergraduate students of introduction to finance, corporate finance, capital markets, financial management and related courses as well as managers undertaking MBAs.

Consequently organizations are coming up with strategies of sharpening their competitive advantage. Many of these strategies are either geared towards minimizing the cost of production, maximizing the net profit, minimizing the customers waiting time or even improving the quality of products produced. Amazon, a multinational corporation dealing with e-commerce, is one of the organizations facing hard times due to global competition. As a result it wants to venture into making dehumidifiers so as to boost its cash flows in the positive direction. This assignment is all about a business plan developed to determine the viability of venturing into making dehumidifiers. A dehumidifier is a device that reduces the amount of humidity in the air. By doing so it reduces the chances of survival of moths, cockroaches, termites and fleas. Thus it helps a lot in preventing the diseases that can be transmitted by these pests. Previous studies have shown that by use of a dehumidifier the chances of transmission of diseases are reduced by 75%. Another advantage of a dehumidifier is that it increases conformability by reducing sweating.
