*The Rideshare Guide* Harry Campbell, 2018-04-03. An industry leader's guide to making Lyft and Uber work for you. In less than five years, ridesharing has grown from nonexistence into a billion-dollar industry. Uber now has two million drivers in the United States; Lyft has seven hundred thousand, and both show no signs of slowing down. Despite the large number of drivers, Uber and Lyft provide little in the way of help for new drivers who complain that there is a lack of guidance when starting out. Harry Campbell, founder and director of *The Rideshare Guy* blog and podcast and a driver himself, can help. *The Rideshare Guide* offers a comprehensive and engaging handbook for current and prospective rideshare drivers. Learn how to decide between Uber and Lyft, maximize passengers and profits, maintain a five-star rating, keep safe, and interact appropriately with passengers. Navigate legal matters and tax codes. Campbell explains these and much more, also including funny, shocking, and bizarre tales from the road. Whether you are thinking about becoming a driver or a veteran wondering about UberPool and tax help, *The Rideshare Guide* by the Rideshare Guy has the answers.

**Intermediated Surge Pricing** Sushil Bikhchandani, 2020. Although Uber and Lyft are known for their flexible surge pricing, they are surprisingly rigid in another way: each firm takes a constant percentage of passenger fare, whether or not there is a surge. In this paper, I investigate the possible reasons for and the impact of this rigidity. I study a market in which a profit-maximizing intermediary facilitates trade between buyers and sellers. The intermediary sets prices for buyers and sellers and keeps the difference as her fee.

Optimal prices increase when demand increases that is shifts right If a demand increase is due to an increase in the number of ex ante symmetric buyers then the intermediary's optimal percent fee decreases If instead a demand increase is due to a reduction in the elasticity of demand then the intermediary's optimal percent fee increases In either case if the intermediary keeps a constant percent fee regardless of shifts in demand as is the case with Uber and Lyft then surge pricing i.e. the ratio of price during high demand to price during low demand is amplified on one side of the market and diminished on the other side

*Rideshare Driver Tax Guide* Joseph Starzyk, 2017-01-30 If you are an Uber or Lyft driver you have a responsibility to properly report your income on your tax return As a Tax CPA I've personally seen countless mistakes that people make reporting their rideshare activity that costs them hundreds if not thousands of dollars on their taxes Don't be one of those people This book will help explain What exactly being a rideshare driver means for federal tax purposes How to maximize your income by minimizing your tax burden Which specific deductions you can take as a rideshare driver and how to maintain adequate records and How to prepare and e-file your tax return for FREE with specific steps and recommendations

**Summary of Harry Campbell's The Rideshare Guide** Everest Media, 2022-05-25T22:59:00Z Please note This is a companion version not the original book

**Sample Book Insights**

- 1 Being an Uber driver isn't as easy as it seems It takes a lot of hard work and skills to be an Uber driver and only a few make it past the difficulties
- 2 As a rideshare driver you're a 1099 independent contractor which means you'll be responsible for all your expenses and file a Schedule C at tax time However this shouldn't scare you since I'll help you stay ahead of the game when it comes to taxes and reporting
- 3 Rideshare drivers put a lot of miles on their cars A full-time driver can easily do a thousand miles a week or more and if you subtract the cost of gas from your earnings you'll see that your net earnings can be significantly lower than the 459.18 shown in the table
- 4 The ultimate flexibility Uber allows you to make money on a whim However most people don't need this flexibility You'll want to work enough to get in a rhythm and start earning decent money

**Driver Surge Pricing** Nikhil Garg, 2020 Ride hailing marketplaces like Uber and Lyft use dynamic pricing often called surge to balance the supply of available drivers with the demand for rides We study driver-side payment mechanisms for such marketplaces presenting the theoretical foundation that has informed the design of Uber's new additive driver surge mechanism We present a dynamic stochastic model to capture the impact of surge pricing on driver earnings and their strategies to maximize such earnings In this setting some time periods surge are more valuable than others non-surge and so trips of different time lengths vary in the induced driver opportunity cost First we show that multiplicative surge historically the standard on ride hailing platforms is not incentive compatible in a dynamic setting We then propose a structured incentive compatible pricing mechanism This closed-form mechanism has a simple form and is well approximated by Uber's new additive surge mechanism Finally through both numerical analysis and real data from a ride hailing marketplace we show that additive surge is more incentive compatible in practice than is multiplicative surge
