Features beyond the Oracle database: Oracle Application Express, Fusion Middleware, including Oracle Application Server and database SOA support, as a Web services provider. The latest Oracle Database 11g features: query result set caching, Automatic Memory Management, the Real Application Testing Advanced Compression, Total Recall, and Active Data Guard Option. Options changes to the OLAP Option transparently accessed and managed as materialized views, the Flashback transaction command, transparent data encryption, the Support Workbench, and diagnosability infrastructure and partitioning enhancements, including interval and new composite types.
