Web Game Dev Zoe Codewell, AI, 2025-02-17 Web Game Dev offers a comprehensive guide to creating interactive browser based games using HTML5 and JavaScript. This book explores the fundamentals of web game development emphasizing the HTML5 Canvas API for graphics and JavaScript for game logic. You'll discover how to build games accessible on multiple platforms without native installations taking advantage of current web standards and popular game frameworks. Did you know that mastering fundamental web technologies combined with efficient game development practices can lead to significant results in browser gaming? The book adopts a hands on approach guiding you through drawing shapes, manipulating pixels and creating animations with the Canvas API. It then delves into JavaScript game loops, object oriented programming, collision detection and input handling. Progressing further, Web Game Dev compares game frameworks like Phaser and PixiJS, demonstrating their practical usage. The book culminates in a case study showcasing the development of a complete 2D game from start to finish, integrating all the concepts discussed to provide valuable insights and skills for web developers and programmers interested in game development.

As part of their CelebrateBlogging initiative, BlogAdda.com ran the first edition of Game of Blogs in September 2014. Five characters and their descriptions were provided. The objective was to write a fictional story revolving around these characters. Bloggers came together as teams and after three rounds filled with its own set of twists and turns, three stories made it to the end. The three stories in this book are a fascinating example of how one set of characters can have interesting lives with completely different dimensions. A result of how collaboration can truly breed creativity in the modern day world of connected living.
