Measured Extravagance:

What Kind of a Thing Is a Middle English Lyric? Cristina Maria Cervone, Nicholas Watson, 2022-08-30 *What Kind of a Thing Is a Middle English Lyric* considers issues pertaining to a corpus of several hundred short poems written in Middle English between the twelfth and early fifteenth centuries. The chapters draw on perspectives from varied disciplines including literary criticism, musicology, art history, and cognitive science. Since the early 1900s, the poems have been categorized as lyrics, the term now used for most kinds of short poetry, yet neither the difficulties nor the promise of this treatment have received enough attention. In one way, the book argues, considering these poems to be lyrics obscures much of what is interesting about them. Since the nineteenth century, lyrics have been thought of as subjective and best read without reference to cultural context, yet nonetheless they are taken to form a distinct literary tradition. Since Middle English short poems are often communal and usually spoken, sung, and/or danced, this lyric template is not a good fit. In another way, however, the very differences between these poems and the later ones on which current debates about the lyric still focus suggest they have much to offer those debates and vice versa. As its title suggests, this book thus goes back to the basics, asking fundamental questions about what these poems are, how they function formally and culturally, how they are and are not related to other bodies of short poetry, and how they might illuminate and be illuminated by contemporary lyric scholarship. Eleven chapters by medievalists and two responses by modernists all in careful conversation with one another reflect on these questions and suggest very different answers. The editors' introduction synthesizes these answers by suggesting that these poems can most usefully be read as a kind of play in several senses of that word. The book ends with eight new Middle English lyrics by seven contemporary poets.

The Budget System as a Preventive Measure Against Public Extravagance Benjamin Loring Young, 1924 *Biographical, Literary, and Political Anecdotes, of Several of the Most Eminent Persons of the Present Age* John Almon, 1797 **Biographical, Literary, and Political Anecdotes of Several of the Most Eminent Persons of the Present Age. Never Before Printed** John Almon, 1797 **A History of French Literature** Charles Woodward Hutson, 1889 Honoré de Balzac references on p. 26 and 303 **Neuronal and Psychological Underpinnings of Pathological Gambling** Bryan F. Singer, Patrick Anselme, Mike James Ferrar Robinson, Paul Vezina, 2014-11-04 Like in the case of drugs, gambling hijacks reward circuits in a brain which is not prepared to receive such intense stimulation. Dopamine is normally released in response to reward and uncertainty in order to allow animals to stay alive in their environment where rewards are relatively unpredictable. In this case, behavior is regulated by environmental feedbacks leading animals to persevere or to give up. In contrast, drugs provide a direct intense pharmacological stimulation of the dopamine system that operates independently of environmental feedbacks and hence causes motivational runaways. With respect to gambling, the confined environment experienced by gamblers favors the emergence of excitatory conditioned cues so that positive feedbacks take over negative feedbacks. Although drugs and

gambling may act differently their abnormal activation of reward circuitry generates an underestimation of negative consequences and promotes the development of addictive compulsive behavior In Parkinson s and Huntington s disease dopamine related therapies may disrupt these feedbacks on dopamine signalling potentially leading to various addictions including pathological gambling The goal of this Research Topic is to further our understanding of the neurobiological mechanisms underlying the development of pathological gambling This eBook contains a cross disciplinary collection of research and review articles ranging in scope from animal behavioral models to human imaging studies
