The Mathematical and Philosophical Legacy of Alexander Grothendieck Marco Panza, Daniele C. Struppa, Jean-Jacques Szczeciniarz, 2025-01-21 Alexander Grothendieck is often considered one of the greatest mathematicians of the twentieth century if not all time and his unique vision continues to impact and inspire many fields and researchers today Utilizing a multidisciplinary approach this edited volume explores the profound influence his work and ideas have had not only on mathematics but also on logic and philosophy Chapters are written by international scholars and many were inspired by talks given at the conference Grothendieck A Multifarious Giant at Chapman University May 24 28 2022 Some chapters are written from a historical perspective and discuss the development of the main themes that characterized Grothendieck's work Others are more mathematical in nature analyzing and extending some of his more relevant and obscure results that are still not well understood Philosophical implications and applications in logic are the subjects of other chapters This volume will be of interest not only to mathematicians working in algebraic geometry category theory and other areas to which Grothendieck contributed but also to philosophers logicians and historians of science

Shadows of Reality Tony Robbin, 2008-10-01 In this insightful book which is a revisionist math history as well as a revisionist art history Tony Robbin well known for his innovative computer visualizations of hyperspace investigates different models of the fourth dimension and how these are applied in art and physics Robbin explores the distinction between the slicing or Flatland model and the projection or shadow model He compares the history of these two models and their uses and misuses in popular discussions Robbin breaks new ground with his original argument that Picasso used the projection model to invent cubism and that Minkowski had four dimensional projective geometry in mind when he structured special relativity The discussion is brought to the present with an exposition of the projection model in the most creative ideas about space in contemporary mathematics such as twisters quasicrystals and quantum topology Robbin clarifies these esoteric concepts with understandable drawings and diagrams Robbin proposes that the powerful role of projective geometry in the development of current mathematical ideas has been long overlooked and that our attachment to the slicing model is essentially a conceptual block that hinders progress in understanding contemporary models of spacetime He offers a fascinating review of how projective ideas are the source of some of today's most exciting developments in art math physics and computer visualization

The Arts of Ornamental Geometry, 2017-08-28 This collective study focuses on a unique anonymous medieval document on ornamental geometry featuring geometrical constructions and textual instructions in Persian Selections from the unpublished work of Alpay zdural d 2003 on this subject have been updated with original contributions by Jan P Hogendijk Elaheh Kheirandish G lru Necipo lu and Wheeler M Thackston The chapters interpreting this fascinating document are followed for the first time by a facsimile transcription and translation as well as drawings of incised construction lines invisible in the photographed facsimile This publication intersects with the current interest in Islamic geometrical patterning

as an inspiration for tessellation and parametrically derived forms in contemporary architecture and the arts It aims to make this celebrated source more accessible given its multifaceted relevance to historians of art architecture and science as well as mathematicians physicists artists and architects For those who wish to obtain a copy of the full unedited original book manuscript of Alpay zdural where he discusses the mathematical properties of all geometrical constructions in the Anonymous Compendium as well as the step by step method for drawing each one his work is available online at <https://doi.org/10.6084/m9.figshare.5255416>
