Conference Interpreting Andrew Gillies, 2013-07-24 Conference Interpreting A Student s Practice Book brings together a comprehensive compilation of tried and tested practical exercises which hone the sub skills that make up successful conference interpreting Unique in its exclusively practical focus Conference Interpreting A Student s Practice Book serves as a reference for students and teachers seeking to solve specific interpreting related difficulties By breaking down the necessary skills and linking these to the most relevant and effective exercises students can target their areas of weakness and work more efficiently towards greater interpreting competence Split into four parts this Practice Book includes a detailed introduction offering general principles for effective practice drawn from the author s own extensive experience as an interpreter and interpreter trainer The second language section covers language enhancement at this very high level an area that standard language courses and textbooks are unable to deal with The last two sections cover the key sub skills needed to effectively handle the two components of conference interpreting simultaneous and consecutive interpreting Conference Interpreting A Student s Practice Book is non language specific and as such is an essential resource for all interpreting students regardless of their language combination

Parallel Processing for Artificial Intelligence 3 J. Geller, H. Kitano, C.B. Suttner, 1997-02-10 The third in an informal series of books about parallel processing for Artificial Intelligence this volume is based on the assumption that the computational demands of many AI tasks can be better served by parallel architectures than by the currently popular workstations However no assumption is made about the kind of parallelism to be used Transputers Connection Machines farms of workstations Cellular Neural Networks Crays and other hardware paradigms of parallelism are used by the authors of this collection The papers arise from the areas of parallel knowledge representation neural modeling parallel non monotonic reasoning search and partitioning constraint satisfaction theorem proving parallel decision trees parallel programming languages and low level computer vision The final paper is an experience report about applications of massive parallelism which can be said to capture the spirit of a whole period of computing history This volume provides the reader with a snapshot of the state of the art in Parallel Processing for Artificial Intelligence
