Science Experiments Usa:

47 Easy-to-Do Classic Science Experiments Eugene F. Provenzo, Asterie Baker Provenzo, 2012-07-31 Here is a highly motivating book for grade school students that will introduce them to many of the world's most popular and historically significant scientific experiments They'll learn about gravity simply by following the acrobatic antics of an ordinary coin By trying to blow an egg out of a cup they'll discover the principles of air pressure Dancing soap bubbles will help them understand the effects of static electricity and by dropping quarters into a full glass of water without causing it to overflow they'll study the effects of surface tension These and over 40 other experiments have been carefully selected by noted educators Eugene and Asterie Baker Provenzo to familiarize children with classic science experiments involving optics inertia air pressure magnetism sound topology light density vibration prisms elasticity gases vacuum perspective geometry centrifugal force buoyancy color and much more Some experiments such as the optical Newton's Rings are hundreds of years old Still others like the straw lever test are based on Greek experiments with leverage and the center of gravity first carried out thousands of years ago Easy to follow instructions and illustrations show youngsters how to perform each experiment most of which are prefaced with historical background a list of necessary materials and an explanation of key terms Almost all experiments can be carried out with common household items tissue paper scissors tapes rubber balloons pens pencils etc and can be worked at home or in the classroom to demonstrate specific scientific principles or to supplement a science curriculum unit Sources for all historical illustrations given in the text are listed at the end of the book
