

McKesson Quality eMeasures™ for Horizon Clinicals®

Benefits

- Meets AHRQ, Stage 1 reporting requirements.
- Integrates seamlessly with your McKesson EHR.
- Reduces IT impact with the same technology model.
- Includes business advisors to facilitate enterprise-wide adoption of metrics.

To receive Medicare and Medicaid reimbursement under the Health Information Technology for Economic and Clinical Health (HITECH) Act, hospitals must report on 15 hospital quality measures using certified electronic health record (EHR) technology to collect and calculate data. Manual data abstraction is not allowed. McKesson Quality eMeasures™ calculates and submits meaningful use quality measures to the Centers for Medicare & Medicaid Services (CMS) and the states, providing an integrated approach to meeting reporting requirements.

Measurement as a By-Product of Patient Care

Quality measure calculation requires complete calculations and statistical comparisons. Measurements rely on McKesson Di-coded problems, procedures and diagnoses, LOINC®-coded lab results, McKesson-coded medication administrations, and other discrete, coded data captured as a by-product of patient care. McKesson Quality eMeasures extracts data, calculates each measure, and displays results in a dynamic, scorecard, attachment report, or submission file that enables fast, patient-level analysis.

Seamless Technology

The McKesson Quality eMeasures solution is a core component of your EHR. Clinical documentation captured at the point of care is extracted regularly and automatically, improving rapidly returning reliable information.

The web-based software as a service (SaaS) model allows stakeholders immediate access to view, monitor and analyze results as needed. As new measures are introduced, McKesson will quickly incorporate changes into the calculations for prompt reporting feedback.

Getting Started

McKesson Quality eMeasures is available to customers with fully installed EHR technology and implementation certified and prescription clinical content. To capture the data necessary for metric calculations, organizations must be live, functional on the following products:

- Horizon Emergency Care™ (or other certified EHR)
- Horizon Expert Orders™
- Horizon Admins Rx™
- Horizon Health Summary™
- Horizon Expert Documentation™

The implementation of McKesson Quality eMeasures begins within approximately 30 days of your Horizon Clinicals® 10.0.1 go-live and spans approximately six to eight weeks.
