Parker, 1977 Books In Print 2004-2005 Ed Bowker Staff, Staff Bowker, Ed, 2004 **Cooling and Heating Load Calculation Manual** Faye C. McQuiston, American Society of Heating, Refrigerating and Air-Conditioning Engineers, Jeffrey D. Spitler, 1992 Provide a comprehensive source of theory procedures and data for cooling and heating load calculations for other than residential buildings *Solutions Manual for Heating Ventilating and Air Conditioning* McQuiston, 1978-07-01 **Fundamentals of Geothermal Heat Pump Systems** Louis Lamarche, 2023-10-05 Fundamentals of Geothermal Heat Pump Systems Design and Application is written for upper level undergraduate and graduate courses in renewable energy and heat transfer This classroom tested text covers ground heat exchanger modeling secondary loop ground source system design pumping energy thermal response testing commercial building applications and horizontal and groundwater ground heat exchangers The book is oriented to practical applications including the economic analysis of ground source heat pump GSHP systems but more theoretical sections are provided covering research related geothermal applications Chapters on heat transfer fundamentals and heat pump concepts are included for readers less familiar with thermal engineering concepts A chapter covering the economic analysis of GSHP systems is also included All of the examples and problems in the book are solved using the open source Python programming language The book will provide students in geothermal energy courses with a solid understanding of the subject It will also be a valuable reference for professionals working in the field of renewable energy Heating and Cooling with Ground-Source Heat Pumps in Moderate and Cold Climates, Two-Volume Set Vasile Minea, 2022-07-30 Heating and Cooling with Ground Source Heat Pumps in Moderate and Cold Climates Two Volume Set focuses on the use of very low temperature geothermal energy for heating and cooling residential institutional and industrial buildings and aims to increase the design community's awareness and knowledge of the benefits design and installation requirements of commercial institutional building ground source heat pumps GSHP This set helps readers assess applicability select a GSHP system type and estimate building thermal load to ensure proper size for ground source subsystems appropriate brine and groundwater flow rates and apt design of building closed loops with distributed or central geothermal heat pumps The first volume addresses fundamentals and design principles of vertical and horizontal indirect and direct expansion closed loop as well as ground and surface water ground source heat pump systems It explains the thermodynamic aspects of mechanical and thermochemical compression cycles of geothermal heat pumps as well as the energetic economic and environmental aspects associated with the use of ground source heat pump systems for heating and

cooling residential and commercial institutional buildings in moderate and cold climates The second volume focuses on applications and cases studies of ground source heat pumps in moderate and cold climates It details technical aspects as well as the most common and uncommon application fields of basic system configurations The principles of system integrations and applications in moderate and cold climates are also presented each followed by case studies This comprehensive work is aimed at designers of HVAC systems as well as geological mechanical and chemical engineers implementing environmentally friendly heating and cooling technologies for buildings      *Modeling and Optimization of Renewable Energy Systems* Arzu Şencan,2012-05-11 This book includes solar energy wind energy hybrid systems biofuels energy management and efficiency optimization of renewable energy systems and much more Subsequently the book presents the physical and technical principles of promising ways of utilizing renewable energies The authors provide the important data and parameter sets for the major possibilities of renewable energies utilization which allow an economic and environmental assessment Such an assessment enables us to judge the chances and limits of the multiple options utilizing renewable energy sources It will provide useful insights in the modeling and optimization of different renewable systems The primary target audience for the book includes students researchers and people working on renewable energy systems      **Engineering Education** ,1981

*Advances in Building Services Engineering* Ioan Sarbu,2021-01-04 This book provides a comprehensive systematic overview of original theoretical experimental and numerical studies in the building services engineering domain It brings together different strands of the topic guided by the two key features of energy savings and reduction of the pollutant emissions Technical economic and energy efficiency aspects related to the design modelling optimisation and operation of diverse building services systems are explored This book includes various theoretical studies numerical and optimisation models experiments and applications in this field giving an emphasis to indoor environment quality assurance energy analysis modelling and optimisation of heating systems improving the energy performance of refrigeration and air conditioning systems valorising the solar and geothermal energies analysis of thermal energy storage technologies hydraulic simulation and optimisation of water distribution systems and improving the energy efficiency of water pumping With 11 pedagogically structured chapters containing numerous illustrations tables and examples this book provides researchers lecturers engineers and graduate students with a thorough guide to building service engineering      *Heating, Ventilating, and Air Conditioning* Faye C. McQuiston,Jerald D. Parker,1988-04-05 A new edition of the popular HVAC text reflecting the latest changes in the ASHRAE literature Includes expanded coverage of automatic control moist air properties and contains new data for floor slabs and underground walls and floors Increased emphasis has been placed on the effects of barometric pressure Now covers energy calculation by the bin method design of large hydronic systems with variable flow the energy grade line concept and includes new data for duct fittings and compressor performance Uses a dual system of units
