## **Measuring Multiple Intelligences And Moral Sensitivities In Education:**

*Measuring Multiple Intelligences and Moral Sensitivities in Education* Kirsi Tirri, Petri Nokelainen, 2012-01-01 In this book we introduce several sensitivity measures in educational contexts that can be used in research education and self evaluations In Chapter 1 we discuss the framework of Howard Gardner's Multiple Intelligences theory and introduce our Multiple Intelligences Profiling Questionnaire We present the psychometrical qualities of the instrument with empirical data sets of children youth and adults In Chapter 2 the Spiritual Sensitivity Scale is introduced with the theoretical framework it is connected to The existence of spiritual intelligence has been a widely debated issue and not everybody is ready to call advanced thinking in religious or spiritual domains as intelligence This has guided us to use the term sensitivity which is easier to justify than intelligence in these areas of human behavior In Chapter 3 we introduce the Environmental Sensitivity Scale which is quite close to the possible intelligence of naturalist suggested by Gardner In Chapter 4 Ethical Sensitivity Scale is introduced followed by Emotional Leadership Questionnaire in Chapter 5 All these scales have a solid theoretical framework and earlier empirical work to support the instrument building Chapter 6 introduces Intercultural and Interreligious Sensitivity Scales with their theoretical frameworks and earlier empirical work Following each chapter we have included a ready to use version of the questionnaire and SPSS syntax to compute factors A commentary by Dr Seana Moran compliments the book and challenges the readers to further reflect the meaning of education in supporting holistic development of learners in their life long journey We have authored this book to contribute to this goal and hope it will be used in the hands of researchers teachers and students in their mutual effort to grow and to learn new things in life

**Moral Professionalism in Interaction** Eija Hanhimäki, **Giftedness and Talent in the 21st Century** Don Ambrose, Robert J. Sternberg, 2016-07-15 When today's gifted and talented young people emerge into adulthood will they be able to overcome some enormous 21st century problems that are pushing us toward large scale socioeconomic devastation Will they be able to capitalize on unprecedented opportunities that can lead to widespread prosperity and fulfillment This book explores these questions while yielding insights from many of the world's leading scholars of giftedness and talent development Until now there has been inadequate understanding of 21st century trends and

issues that influence the gifted and talented. The book provides some clarity by establishing a big picture interdisciplinary overview of the socioeconomic cultural and technological pressures emerging from 21st century globalization and describing some ways in which those pressures simultaneously suppress, distort and invigorate the discovery of aspirations and the development of talents. Throughout the volume, prominent scholars of gifted education and talent development use their impressive knowledge bases to clarify how we can adjust our thoughts and actions in order to give ourselves the best possible chances for success in this complex world. This impressive volume, edited by two of the world's leading thinkers on these topics, includes the perspectives of many of our best thinkers on issues of talent development and giftedness and they offer an array of provocative perspectives on how we can better address our culture's and our economy's tremendous need for talent in the 21st century. Jonathan Plucker, Julian C. Stanley, Endowed Professor of Talent Development, Johns Hopkins University. Turbulence in the subtitle is apt. The text, *Giftedness and Talent in the 21st Century*, is filled with strongly voiced perspectives from international authors who focus on how to conceptualize education as a creative and holistic enterprise within the context of globalization. Ann Robinson, Past President, National Association for Gifted Children.

**Teachers' Professional Ethics** Kirsi Tirri, Elina Kuusisto, 2022-09-12. Now available in Open Access thanks to the support of the University of Helsinki. *Teachers' Professional Ethics: Theoretical Frameworks and Empirical Research* from Finland is intended for international readers in education who want to learn the theoretical frameworks that guide teachers' ethics and that help them address concrete challenges in their everyday work. Scholars and teachers from different countries can use this book to widen their understanding of the Finnish educational system and teacher ethics. The authors provide examples of concrete moral dilemmas in teaching that can be more effectively navigated with the rational principles and guidelines that philosophies of different ethical frameworks can provide. They argue that teachers require ethical skills, especially ethical sensitivity, in order to select the most beneficial course of action concerning diverse students in inclusive education. They should be purposeful in their profession to develop the motivation and resilience to continue their demanding but fulfilling work with long term goals. Moreover, they should acknowledge their implicit beliefs and possible stereotypes to be able to provide equal learning opportunities to their students and to build democratic moral communities in their schools. In this book, ethical sensitivity, purposeful teaching and incremental beliefs concerning learning are seen as important prerequisites for teachers' professional ethics. We discuss these aspects with examples from our empirical studies in Finnish schools.
